

1. Record Nr.	UNINA9910484086503321
Titolo	Impacts of rationing and missed nursing care : challenges and solutions : RANCARE action // Evridiki Papastavrou, Riitta Suhonen, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-71073-4
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (X, 201 p. 6 illus., 3 illus. in color.)
Disciplina	362.1
Soggetti	Health care rationing Nursing Nurses - Supply and demand Assistència sanitària Infermeres Mercat de treball Gestió hospitalària Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Understanding missed care: definitions, conceptualization, evidence and prevalence -- Chapter 3. Does rationing of nursing care presupposes an acceptance of missed care? Philosophical and legal aspects -- Chapter 4. Studying missed care: designs, instruments and reporting guidelines -- Chapter 5. An ethical perspective of nursing care rationing and missed care -- Chapter 6. Ethics of doing research within the context of missed nursing care -- Chapter 7. Interventions to reduce / limit MISSED CARE – state of the art and future perspectives -- Chapter 8. Patient safety education for nurses -- Chapter 9: Good management and clinical leadership for better patient outcomes -- Chapter 10. Synergies during the RANCARE Project: opportunities for networking and establishment of collaborations -- Chapter 11. Conclusions and the way forward.
Sommario/riassunto	This book reveals how economic restrictions and limited healthcare

resources, combined with growing care demands due to advanced technology and more care options, have to a great extent contributed to increased workloads for healthcare professionals and put them under pressure to prioritize their work. This has led to the rationing of care, i.e., to decision-making processes on the allocation of scarce resources, especially human resources, and on which care activities take priority over others; in turn, these processes have led to unfinished or missed care, which has serious implications for quality of care and patient safety. Concerns related to nursing shortages and lean staffing practices have increased the awareness of the problem, as patient outcomes are affected by the quality and quantity of care that they receive and led to intensified scientific inquiry into this phenomenon. This book is written by the members of the Rancare Cost Action group, whose aim is to facilitate discussion about rationing of nursing care based on a cross-national comparative approach with implications for practice and professional development. Four working groups investigated four areas for four years: a) the conceptualization of care rationing and methodological inquiries concerning the investigation of the phenomenon, b) exploration of possible solutions and intervention studies, c) the ethical perspective of care rationing and missed care including patients' rights and possible discrimination, and d) the educational implications, based on an exploration of the level of patient safety training and care rationing, as well as preparing guidelines for managers. The book will be a valuable resource for nurses, allied healthcare professionals, managers, policymakers, researchers, ethical committees, and educators whose goal is to provide better and safer care.
