

1. Record Nr.	UNINA9910484097103321
Titolo	Model driven engineering languages and systems : 12th international conference, MODELS 2009, Denver, CO, USA, October 4-9, 2009 ; proceedings / / Andy Schurr, Brian Selic (eds.)
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, c2009
ISBN	3-642-04425-5
Edizione	[1st ed. 2009.]
Descrizione fisica	1 online resource (XX, 756 p.)
Collana	Lecture notes in computer science ; ; 5795
Classificazione	DAT 310f SS 4800
Altri autori (Persone)	SchurrAndreas SelicBran
Disciplina	005.1
Soggetti	Computer software - Development UML (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Keynote 1 -- Models. Models. Models. So What? -- (Meta-)Model Modeling and Management -- Modeling Modeling -- Representation and Traversal of Large Clabject Models -- Meta-model Pruning -- Quantitative Modeling with UML -- A UML/MARTE Model Analysis Method for Detection of Data Races in Concurrent Systems -- Model Driven Performance Measurement and Assessment with MoDePeMART -- Security Analysis of a Biometric Authentication System Using UMLsec and JML -- Model Transformations and Constraints -- Automatically Discovering Hidden Transformation Chaining Constraints -- CSP(M): Constraint Satisfaction Problem over Models -- Parsing SBVR-Based Controlled Languages -- Model Management -- SLIM—A Lightweight Environment for Synchronous Collaborative Modeling -- Language-Independent Change Management of Process Models -- Requirements for Practical Model Merge – An Industrial Perspective -- UML in Practice and Quality Assurance -- Evaluating the Impact of UML Modeling on Software Quality: An Industrial Case Study -- Concern Visibility in Base Station Development – An Empirical Investigation -- Influencing Factors in Model-Based Testing with UML State Machines: Report on an Industrial Cooperation -- Formalization of Model Transformations -- Towards Composite Model Transformations Using Distributed Graph

Transformation Concepts -- On-the-Fly Construction, Correctness and Completeness of Model Transformations Based on Triple Graph Grammars -- Formal Support for QVT-Relations with Coloured Petri Nets -- Scenario Modeling -- An Example Is Worth a Thousand Words: Composite Operation Modeling By-Example -- Refactoring-Safe Modeling of Aspect-Oriented Scenarios -- Model-Based Testing Using LSCs and S2A -- Business Application Development -- Model Driven Development of Graphical User Interfaces for Enterprise Business Applications -- Experience, Lessons Learnt and a Way Forward -- Business Process Models as a Showcase for Syntax-Based Assistance in Diagram Editors -- Rule-Enhanced Business Process Modeling Language for Service Choreographies -- Model Synchronisation and Change Propagation -- Change-Driven Model Transformations -- An Incremental Algorithm for High-Performance Runtime Model Consistency -- Traceability-Based Change Awareness -- Keynote 2 -- Interaction Design and Model-Driven Development -- Language Specification and Annotation -- Towards Test-Driven Semantics Specification -- Scalable Semantic Annotation Using Lattice-Based Ontologies -- OntoDSL: An Ontology-Based Framework for Domain-Specific Languages -- Domain-Specific Languages -- Domain-Specific Languages in Practice: A User Study on the Success Factors -- Evaluating Context Descriptions and Property Definition Patterns for Software Formal Validation -- Anatomy of a Visual Domain-Specific Language Project in an Industrial Context -- Model-Based Analysis -- A Goal-Based Modeling Approach to Develop Requirements of an Adaptive System with Environmental Uncertainty -- A Use Case Modeling Approach to Facilitate the Transition towards Analysis Models: Concepts and Empirical Evaluation -- Polymorphic Scenario-Based Specification Models: Semantics and Applications -- Model (De-) Composition and Abstractio -- Aspect Model Unweaving -- Model Composition Contracts -- Abstracting Complex Languages through Transformation and Composition -- An Approach for Evolving Transformation Chains -- Distributed Software Development -- Deterministic UML Models for Interconnected Activities and State Machines -- Automated Encapsulation of UML Activities for Incremental Development and Verification -- Using UML Statecharts with Knowledge Logic Guards -- Service and Business Process Integration -- A Modeling Language for Activity-Oriented Composition of Service-Oriented Software Systems -- A Domain Specific Modeling Language Supporting Specification, Simulation and Execution of Dynamic Adaptive Systems -- Executable Domain Specific Language for Message-Based System Integration -- Keynote 3 -- Architectural Mining: The Other Side of the MDD -- Genericity and Constraints -- Generic Model Refactorings -- Constraining Type Parameters of UML 2 Templates with Substitutable Classifiers -- Generating Assertion Code from OCL: A Transformational Approach Based on Similarities of Implementation Languages -- OCLLib, OCLUnit, OCLDoc: Pragmatic Extensions for the Object Constraint Language -- Variability Management -- Variability within Modeling Language Definitions -- Variability Modelling throughout the Product Line Lifecycle -- Weaving Variability into Domain Metamodels -- Automatic Domain Model Migration to Manage Metamodel Evolution -- Model Transformation Engineering -- Model Transformation by Demonstration -- Reviving QVT Relations: Model-Based Debugging Using Colored Petri Nets -- Incremental Development of Model Transformation Chains Using Automated Testing -- Test-Driven Development of Model Transformations -- Symposium -- Educators' Symposium at MODELS 2009.

---

This book constitutes the refereed proceedings of the 12th International Conference on Model Driven Engineering Languages and Systems, MoDELS 2009, held in Denver, CO, USA, during October 4-9, 2009. The 45 revised full papers and 13 short papers presented were carefully reviewed and selected from 248 submissions. The book also contains three keynote speeches and contributions to workshops, symposia, tutorials and panels at the conference. The papers are organized in topical sections on (meta-)model Modeling and Management, quantitative modeling with UML, model transformations and constraints, model management, UML in practice and quality assurance, formalization of model transformations, scenario modeling, business application development, model synchronisation and change propagation, language specification and annotation, domain-specific languages, model-based analysis, model (de-)composition and abstraction, distributed software development, service and business process integration, genericity and constraints, variability management, and model transformation engineering.
