

1. Record Nr.	UNINA9910484126103321
Titolo	Techniques, Tools and Methodologies Applied to Global Supply Chain Ecosystems / / edited by Jorge Luis García-Alcaraz, Cuauhtémoc Sánchez-Ramírez, Liliana Avelar-Sosa, Giner Alor-Hernández
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	9783030264888 3030264882
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (478 pages) : illustrations
Collana	Intelligent Systems Reference Library, , 1868-4408 ; ; 166
Disciplina	658.7
Soggetti	Computational intelligence Artificial intelligence Business logistics Computational Intelligence Artificial Intelligence Supply Chain Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Impact of managers and human resources on the supply chain performance -- The role of employees' performance and external knowledge transfer on the supply chain flexibility -- Modern slavery in the global supply chains: the challenges of legislations and mandatory disclosures.
Sommario/riassunto	This book presents the latest developments concerning techniques, tools, and methodologies in supply chain ecosystems. It gathers contributions from a variety of experts, who analyze a range of case studies and industrial sectors such as manufacturing, energy, agricultural, healthcare, humanitarian logistics, and urban goods distribution, to name but a few. The book is chiefly intended to meet the needs of two sectors: firstly, the academic sector, so as to familiarize students, professors, and researchers with the tools that are now being used to optimize supply chains; and secondly, the industrial and managerial sector, so that supply chain management practitioners

can benefit from methods and tools that are yielding valuable results in other contexts.
