Sommario/riassunto	Inventing the Needy offers a powerful, innovative analysis of welfare policies and practices in Hungary from 1948 to the last decade of the twentieth century. Using a compelling mix of archival, interview, and ethnographic data, Lynne Haney shows that three distinct welfare regimes succeeded one another during that period and that they were based on divergent conceptions of need. The welfare society of 1948-1968 targeted social institutions, the maternalist welfare state of 1968-

1985 targeted social groups, and the liberal welfare state of 1985-1996 targeted impoverished individuals. Because they reflected contrasting conceptions of gender and of state-recognized identities, these three regimes resulted in dramatically different lived experiences of welfare. Haney's approach bridges the gaps in scholarship that frequently separate past and present, ideology and reality, and state policies and local practices. A wealth of case histories gleaned from the archives of welfare institutions brings to life the interactions between caseworkers and clients and the ways they changed over time. In one of her most provocative findings, Haney argues that female clients' ability to use the state to protect themselves in everyday life diminished over the fifty-year period. As the welfare system moved away from linking entitlement to clients' social contributions and toward their material deprivation, the welfare system, and those associated with it, became increasingly stigmatized and pathologized. With its focus on shifting inventions of the needy, this broad historical ethnography brings new insights to the study of welfare state theory and politics.

Sommario/riassunto	The early 1960's were a heady time for Catholic laypeople. Pope Pius XII's assurance "You do not belong to the Church. You are the Church" emboldened the laity to challenge Church authority in ways previously considered unthinkable. Empowering the People of God offers a fresh look at the Catholic laity and its relationship with the hierarchy in the period immediately preceding the Second Vatican Council and in the turbulent era that followed. This collection of essays explores a diverse assortment of manifestations of Catholic action, ranging from genteel reform to radical activism, and an equally wide variety of locales, apostolates, and movements.

Sommario/riassunto	<p>The International Conference on Networking (ICN 2005) was the fourth conference in its series aimed at stimulating technical exchange in the emerging and important field of networking. On behalf of the International Advisory Committee, it is our great pleasure to welcome you to the proceedings of the 2005 event. Networking faces dramatic changes due to the customer-centric view, the venue of the next generation networks paradigm, the push from ubiquitous networking, and the new service models. Despite legacy problems, which researchers and industry are still discovering and improving the state of the art, the horizon has revealed new challenges that some of the authors tackled through their submissions.</p> <p>In fact ICN2005 was very well perceived by the international networking community. A total of 651 papers from more than 60 countries were submitted, from which 238 were accepted. Each paper was reviewed by several members of the Technical Program Committee. This year, the Advisory Committee revalidated various accepted papers after the reviews had been incorporated. We perceived a significant improvement in the number of submissions and the quality of the submissions.</p> <p>The ICN2005 program covered a variety of research topics that are of current interest, starting with Grid networks, multicasting, TCP optimizations, QoS and security, emergency services, and network resiliency. The Program Committee selected also three tutorials and invited speakers that addressed the latest research results from the international industries and academia, and reports on findings from mobile, satellite, and personal communications related to 3rd- and 4th-generation research projects and standardization.</p>
