

1. Record Nr.	UNINA9910484132203321
Titolo	Nanotechnology for bioapplications / / Bong-Hyun Jun, editor
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-336-158-1
Descrizione fisica	1 online resource (vi, 292 pages) : illustrations
Collana	Advances in experimental medicine and biology ; ; Volume 1309
Disciplina	620.5
Soggetti	Nanobiotechnology Ultraestructura (Biologia) Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Contents -- 1: Introduction of Nanobiotechnology -- 1.1 Introduction -- 1.2 What Is Nanotechnology? -- 1.2.1 How Small Is Nano? -- 1.2.2 Nanofabrication and Analytical Tools -- 1.2.3 Exotic Properties of the Nanomaterials -- 1.3 Classification of Nanomaterials and Their Application -- 1.3.1 Metal NPs -- 1.3.2 Magnetic NPs -- 1.3.3 Quantum Dots (QDs) -- 1.3.4 Silica NPs -- 1.3.5 Carbon NPs -- 1.4 Nanotoxicology and Future Perspective -- Bibliography -- 2: General in Colloidal Nanoparticles -- 2.1 Introduction -- 2.2 Fabrication of Nanoparticles -- 2.2.1 Nucleation and Growth -- 2.2.1.1 Nucleation -- 2.2.1.2 Growth Kinetics -- 2.2.2 Size Control -- 2.2.2.1 Nucleation Control -- 2.2.2.2 Ostwald Ripening and Sintering -- 2.2.2.3 Microemulsion Method (Template-Based Method) -- 2.3 Stabilization of Nanocrystals Against Aggregation -- 2.3.1 Aggregation -- 2.3.2 Surface Charge -- 2.3.3 Electrical Double Layer -- 2.3.4 Van der Waals Attraction -- 2.3.5 DLVO (Derjaguin, Landau, Verwey, Overbeek) Theory -- 2.3.6 Steric Stabilization -- Bibliography -- 3: Silica Nanoparticles -- 3.1 Introduction -- 3.2 Synthesis of Silica Nanoparticles -- 3.2.1 Stober Method (Nucleation and Growth) -- 3.2.2 Reverse Microemulsions -- 3.2.3 Modified Sol-Gel Method for Silica Coating -- 3.2.4 Modified Sol-Gel Method for Controlling Shape and Porosity -- 3.3 Surface Modification for Functionalization

of Silica Nanoparticles -- 3.4 Various Nanoparticles Applied to Silica --  
3.4.1 Various Silica-Coated Nanoparticles -- 3.4.2 Porous Silica  
Nanoparticles -- 3.4.3 Synthesis of Various Nanoparticles Using Silica  
as a Template -- 3.5 Various Silica-Applied Nanoparticles  
for Bioapplications -- 3.5.1 Biosensing and Bioimaging for Diagnostics  
-- 3.5.2 Drug Delivery -- 3.5.3 Multifunctional Silica Nanoparticles --  
3.6 Conclusion.

Bibliography -- 4: Luminescent Nanomaterials (I) -- 4.1 Introduction  
-- 4.2 Basics of Fluorescence -- 4.2.1 Light and Luminescence --  
4.2.2 Fluorescence Process and Related Terminologies -- 4.2.3  
Organic Dyes As Fluorophores -- 4.3 Luminescent Nanoparticles --  
4.3.1 Fluorescence Organic Dye-Incorporated Materials -- 4.3.1.1  
Dye-Doped Silica Nanoparticles -- 4.3.1.2 Fluorescence-Encoded  
Beads -- 4.3.2 Quantum Dots (QD) -- 4.3.2.1 Fundamentals of QDs  
-- Quantum Confinement Effect -- Optical Properties -- Quantum Yield  
and Surface Structures -- 4.3.2.2 Synthesis of Quantum Dots --  
4.3.2.3 Surface Modifications -- 4.3.3 Upconversion Fluorescent  
Nanoparticles -- 4.3.3.1 Fundamentals of UCNPs -- 4.3.3.2 Synthesis  
and Surface Modification of UCNPs -- 4.3.4 Other Luminescent  
Nanomaterials -- 4.3.4.1 Europium-Based Materials -- 4.3.4.2 Noble  
Metal Nanoclusters -- 4.3.4.3 Other Carbon-Based QDs -- References  
-- 5: Luminescent Nanomaterials (II) -- 5.1 Sensing Mechanisms  
and Techniques -- 5.1.1 Forster Resonance Energy Transfer (FRET) --  
5.1.2 Time-Resolved Fluorescence (TRF) -- 5.1.3 Flow Cytometry --  
5.2 Bioanalytical and Biomedical Application -- 5.2.1 Quantum Dot --  
5.2.2 UCNPs-Based Analysis -- 5.2.3 Europium-Based Analysis -- 5.3  
Bioimaging -- 5.3.1 QD-Based Bioimaging -- 5.3.2 UCNPs-Based  
Imaging -- 5.3.3 Europium-Activated Luminescent Nanoprobes --  
5.3.4 NIR-II Imaging -- 5.4 Therapeutics Cooperated  
with Luminescent Nanoparticles -- 5.4.1 Drug Delivery -- 5.4.2  
Photothermal Therapy -- 5.4.3 Photodynamic Therapy -- 5.5  
Conclusions and Outlook -- References -- 6: Plasmonic Nanoparticles:  
Basics to Applications (I) -- 6.1 Introduction -- 6.2 Synthesis of Metal  
Nanoparticles -- 6.2.1 General Information -- 6.2.2 Citrate Reduction  
Method -- 6.2.3 Reverse Micelle Method -- 6.2.4 Polyol Method.  
6.3 Property of Metal Nanoparticles -- 6.3.1 General Information --  
6.3.2 Localized Surface Plasmon Resonance -- 6.3.3 Effects of Size,  
Shape, Composition, and Environment -- 6.3.3.1 Size-Dependent  
Optical Property -- 6.3.3.2 Shape-Dependent Optical Property --  
6.3.3.3 Composition-Dependent Optical Property -- 6.3.3.4 Effect  
of Interactions with Mediums and Between NPs -- 6.4 Metal-Enhanced  
Process -- 6.4.1 Surface-Enhanced Fluorescence (SEF) -- 6.4.2  
Surface-Enhanced Raman Scattering (SERS) -- 6.4.3 Plasmon  
Resonance Energy Transfer (PRET) -- 6.5 Basics for Biomedical  
Application of Metal Nanoparticles -- Bibliography -- 7: Plasmonic  
Nanoparticles: Advanced Researches (II) -- 7.1 Advanced Synthetic  
Researches -- 7.2 Recent Advanced Application in Biomedical Research  
-- 7.2.1 In Vitro Biosensors -- 7.2.2 Intracellular Detection and Ex  
Vivo/In Vivo Imaging -- 7.2.3 Therapeutic Applications -- 7.3  
Conclusions and Outlook -- Bibliography -- 8: Magnetic Nanoparticles  
-- 8.1 Introduction -- 8.2 Synthesis of Magnetic Nanoparticles --  
8.2.1 General Information -- 8.2.2 Coprecipitation -- 8.2.3 Thermal  
Decomposition -- 8.2.3.1 New Type of Thermal Decomposition --  
8.2.4 Microemulsion -- 8.3 Physical Properties of Magnetic  
Nanoparticles -- 8.3.1 Units of Magnetic Property -- 8.3.2 Hysteresis  
Effect, Coercivity, and Remanence -- 8.3.3 Domain Theory -- 8.3.4  
Magnetic Properties of Nanoparticles -- 8.3.5 Curie Temperature --  
8.4 Magnetism -- 8.4.1 Classification of Magnetism -- 8.4.2

Ferromagnetism -- 8.4.3 Ferrimagnetism -- 8.4.4  
Superparamagnetism -- 8.5 Current Trends of Magnetic Nanoparticles  
-- 8.5.1 Separation/Purification of Biomolecules -- 8.5.2  
Hyperthermia -- 8.5.3 Drug Delivery -- 8.5.4 Magnetic Resonance  
Imaging (MRI) -- 8.5.5 Multifunctional Nanocomposites Possessing  
Magnetic Property.  
8.5.5.1 Multimodal Imaging -- 8.5.5.2 Theragnosis/Theragnostics --  
Bibliography -- 9: Lithography Technology for Micro-  
and Nanofabrication -- 9.1 Introduction -- 9.2 Conventional  
Lithography -- 9.2.1 Photolithography -- 9.2.2 High-Energy Beam  
Lithography -- 9.2.2.1 Electron Beam Lithography -- 9.2.2.2 Focused  
Ion Beam Lithography -- 9.3 Unconventional Lithography -- 9.3.1  
Nanoimprint Lithography (NIL) -- 9.3.1.1 Thermal NIL -- 9.3.1.2 UV-  
NIL -- 9.3.2 Deformation of Material-Based Lithography -- 9.3.2.1  
Wrinkling -- 9.3.2.2 Cracking -- 9.3.2.3 Collapsing -- 9.3.3 Colloidal  
Lithography -- 9.3.3.1 Self-Assembly of Colloidal Particles -- 9.3.3.2  
Colloidal Particle-Based Patterning -- 9.4 Overlook and Conclusions --  
Bibliography -- 10: Bioapplications of Nanomaterials -- 10.1 Overview  
-- 10.2 Pharmaceutical Applications -- 10.2.1 Drug Delivery  
and Targeting Strategies -- 10.3 Biosensing and Biochips -- 10.3.1  
SERS-Based Intracellular Biosensing -- 10.3.1.1 Gaseous Sensing --  
10.3.1.2 pH Sensing -- 10.3.1.3 Reactive Oxygen Species (ROS) --  
10.3.1.4 Redox Potential Sensing -- 10.3.2 Detection of Biomolecules  
by SERS -- 10.3.2.1 Proteins -- 10.3.2.2 DNA -- 10.3.2.3 Metabolite  
-- 10.3.2.4 Pathogens -- 10.4 Gene Delivery -- 10.5 Bioimaging --  
10.5.1 SERS-Based Cellular Imaging -- 10.5.2 Imaging of Cell Surface  
Species -- 10.5.3 Endocytic Pathway -- 10.5.4 Cell Cycle  
and Apoptotic Process -- 10.5.5 Cell Secretion -- 10.6 Cancer  
Diagnostics and Therapeutics -- Bibliography -- 11: Carbon  
Nanomaterials for Biomedical Application -- 11.1 Introduction -- 11.2  
Properties of Carbon-Based Nanomaterials -- 11.2.1 Graphite  
and Fullerene -- 11.2.2 Carbon Nanotube -- 11.2.3 Graphene  
and Derivatives -- 11.3 Surface Functionalization of Carbon  
Nanomaterials -- 11.3.1 Noncovalent Surface Chemistry.  
11.3.2 Covalent Surface Chemistry -- 11.4 Carbon Nanomaterials  
for Biological Applications -- 11.4.1 In Vitro Sensing Elements  
and Diagnostics -- 11.4.2 Graphene Nanopore and Graphene Liquid  
Cell -- 11.4.3 Functional 3D Carbon Nanomaterials -- 11.4.4  
Photothermal Therapy -- 11.4.5 Tissue Engineering Using Carbon  
Materials -- 11.5 Conclusions and Outlook -- References -- 12:  
Optical and Electron Microscopy for Analysis of Nanomaterials -- 12.1  
Introduction -- 12.2 Optical Microscopy -- 12.3 Electron Microscopy  
(EM) -- 12.3.1 Transmission Electron Microscopy (TEM) -- 12.3.2  
Scanning Electron Microscopy (SEM) -- 12.4 Scanning Probe  
Microscopy (SPM) -- 12.4.1 Scanning Tunneling Microscopy (STM) --  
12.4.2 Atomic Force Microscopy (AFM) -- 12.4.3 Near-Field Scanning  
Optical Microscopy (NSOM) -- 12.5 Outlook and Summary --  
References -- 13: Conclusion and Perspective -- 13.1 Conclusion --  
13.2 Perspective.
