

1. Record Nr.	UNINA9910484159103321
Autore	Frohlich Steffen <1973->
Titolo	Coulomb frames in the normal bundle of surfaces in Euclidean spaces : topics from differential geometry and geometric analysis of surfaces // Steffen Frohlich
Pubbl/distr/stampa	Heidelberg ; ; New York, : Springer Verlag, 2012
ISBN	3-642-29846-X
Edizione	[1st ed. 2012.]
Descrizione fisica	1 online resource (XIV, 117 p.)
Collana	Lecture notes in mathematics ; ; 2053
Disciplina	516.36
Soggetti	Geometry, Differential Frames (Combinatorial analysis)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 107-111) and index.
Nota di contenuto	Surface Geometry -- Elliptic Systems -- Normal Coulomb Frames in R^4 -- Normal Coulomb Frames in R^{n+2} .
Sommario/riassunto	This book is intended for advanced students and young researchers interested in the analysis of partial differential equations and differential geometry. It discusses elementary concepts of surface geometry in higher-dimensional Euclidean spaces, in particular the differential equations of Gauss-Weingarten together with various integrability conditions and corresponding surface curvatures. It includes a chapter on curvature estimates for such surfaces, and, using results from potential theory and harmonic analysis, it addresses geometric and analytic methods to establish the existence and regularity of Coulomb frames in their normal bundles, which arise as critical points for a functional of total torsion.
