Sommario/riassunto

This book constitutes the refereed proceedings of the 4th International
 Conference on Distributed Computing and Internet Technology, ICDCIT
 2007, held in Bangalore, India, in December 2007. The 13 revised full
 papers and 20 revised short papers presented together with 3 invited
 papers were carefully reviewed and selected from 170 submissions.
 Covering the main areas distributed computing, internet technology,
 system security, data mining, and software engineering the papers are
 subdivided in topical sections on network protocols, security and
 privacy, network management, network services, e-application
 engineering, e-application services, and e-applications.
