1. Record Nr. UNINA9910484194903321

Titolo	Algorithmic aspects in information and management : 5th international conference, AAIM 2009, San Francisco, CA, USA, June 15-17, 2009, proceedings / / [edited by] Rudolf Fleischer, Jinhui Xu
Pubbl/distr/stampa	New York, : Springer, 2009
ISBN	3-642-02158-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (X, 327 p.)
Collana	Lecture notes in computer science ; ; 5564
Altri autori (Persone)	FleischerRudolf <1964-> XuJinhui
Disciplina	005.1
Soggetti	Management science - Mathematical models Computer algorithms
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Algorithmic Challenge in Online Advertising -- Parallel Algorithms for Collaborative Filtering -- On the Approximability of Some Haplotyping Problems -- On Acyclicity of Games with Cycles -- Discrete online TSP -- On Approximating an Implicit Cover Problem in Biology -- Power Indices in Spanning Connectivity Games -- Efficiently Generating k-Best Solutions to Procurement Auctions -- Integer Polyhedra for Program Analysis -- Line Segment Facility Location in Weighted Subdivisions -- Algorithms for Placing Monitors in a Flow Network -- Three Results on Frequency Assignment in Linear Cellular Networks -- Link Distance and Shortest Path Problems in the Plane -- Orca Reduction and ContrAction Graph Clustering -- Equiseparability on Terminal Wiener Index -- Effective Tour Searching for TSP by Contraction of Pseudo Backbone Edges -- Optimal Auctions Capturing Constraints in Sponsored Search -- A Note on Estimating Hybrid Frequency Moment of Data Streams -- Two-Level Push-Relabel Algorithm for the Maximum Flow Problem -- A More Relaxed Model for Graph-Based Data Clustering: s-Plex Editing -- Dynamic Position Auctions with Consumer Search -- Nonlinear Optimization over a Weighted Independence System -- Improved Online Algorithms for Multiplexing Weighted Packets in Bounded Buffers -- Latency Constrained Aggregation in Chain Networks Admits a PTAS -- Cutting a Cake for Five People -- PLDA: Parallel Latent

Dirichlet Allocation for Large-Scale Applications -- On Job Scheduling with Preemption Penalties.
