Sommario/riassunto

This book constitutes the refereed proceedings of the 29th
International Conference on Applications and Theory of Petri Nets and
Other Models of Concurrency, PETRI NETS 2008, held in Xi'an, China, in
June 2008. The 19 revised full regular papers and 4 revised tool papers
presented together with 5 invited papers were carefully reviewed and
selected from 75 submissions. All current issues on research and
development in the area of Petri nets and modeling of concurrent
systems are addressed. .
