Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Extremely High Capacity, Secure, Image Steganography based on composite Edge Detection, with message Integrity -- A Distributed Fault Analysis (DFA) Method for Fault Tolerance in High-Performance Computing Systems -- Software Cost Estimation For Python Projects Using Genetic Algorithm -- Performance Evaluation of Queue with Negative Arrivals, Second Optional Service and Unreliable Server in Communication Networks -- An Empirical Analysis on Retrieval of Math Information from the Scientific Documents -- One shot Digit classification based on Human concept learning -- Appropriateness of Machine Learning Techniques for TCP with MANETs.
Sommario/riassunto	This book gathers selected research papers presented at the International Conference on Communication and Intelligent Systems (ICCIS 2019), organised by Swami Keshvanand Institute of Technology,

Management & Gramothan (SKIT), Jaipur, India and Rajasthan Technical University, Kota, India on 9–10 November 2019. This book presents a collection of state-of-the-art research work involving cutting-edge technologies for communication and intelligent systems. Over the past few years, advances in artificial intelligence and machine learning have sparked new research efforts around the globe, which explore novel ways of developing intelligent systems and smart communication technologies. The book presents single- and multi-disciplinary research on these themes in order to make the latest results available in a single, readily accessible source.
