

1. Record Nr.	UNINA9910484261203321
Autore	Diethelm Kai
Titolo	The analysis of fractional differential equations : an application-oriented exposition using differential operators of Caputo type // Kai Diethelm
Pubbl/distr/stampa	Berlin, : Springer, c2010
ISBN	9786613569752 9781280391835 1280391839 9783642145742 3642145744
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (VIII, 247 p. 10 illus.)
Collana	Lecture notes in mathematics, , 1617-9692 ; ; 2004
Disciplina	515/.83
Soggetti	Differential equations Fractional calculus
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 237-244) and index.
Nota di contenuto	Fundamentals of Fractional Calculus -- Riemann-Liouville Differential and Integral Operators -- Caputo's Approach -- Mittag-Leffler Functions -- Theory of Fractional Differential Equations -- Existence and Uniqueness Results for Riemann-Liouville Fractional Differential Equations -- Single-Term Caputo Fractional Differential Equations: Basic Theory and Fundamental Results -- Single-Term Caputo Fractional Differential Equations: Advanced Results for Special Cases -- Multi-Term Caputo Fractional Differential Equations.
Sommario/riassunto	Fractional calculus was first developed by pure mathematicians in the middle of the 19th century. Some 100 years later, engineers and physicists have found applications for these concepts in their areas. However there has traditionally been little interaction between these two communities. In particular, typical mathematical works provide extensive findings on aspects with comparatively little significance in applications, and the engineering literature often lacks mathematical detail and precision. This book bridges the gap between the two communities. It concentrates on the class of fractional derivatives most

important in applications, the Caputo operators, and provides a self-contained, thorough and mathematically rigorous study of their properties and of the corresponding differential equations. The text is a useful tool for mathematicians and researchers from the applied sciences alike. It can also be used as a basis for teaching graduate courses on fractional differential equations.

2. Record Nr.	UNINA9910625175303321
Titolo	IEEE transactions on cognitive and developmental systems
Pubbl/distr/stampa	Piscataway, NJ : , : Institute of Electrical and Electronics Engineers, , [2016]
ISSN	2379-8939
Disciplina	006.3
Soggetti	Cognitive neuroscience Neuroplasticity Brain - Growth Cognition - physiology Neuronal Plasticity Brain - growth & development Neurosciences cognitives Plasticite neuronale Cerveau - Croissance Robotique Intelligence artificielle artificial intelligence Periodicals.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Periodico
Note generali	"Sponsored by the IEEE Computational Intelligence Society and the IEEE Consumer Electronics Society."
