

1. Record Nr.	UNINA9910484270403321
Titolo	Emergency Surgery for Low Resource Regions // edited by Francesco Piscioneri, Yoram Kluger, Luca Ansaloni
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-68099-1
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (189 pages)
Collana	Hot Topics in Acute Care Surgery and Trauma, , 2520-8292
Disciplina	617.026
Soggetti	Surgery Blood-vessels - Surgery Critical care medicine Emergency medicine Tropical medicine General Surgery Vascular Surgery Intensive Care Medicine Emergency Medicine Tropical Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1 Changing face of acute surgery and increasing disparity between developed and developing countries -- 2 Minimum requirements for an acute surgical facility -- 3 Organisation of surgical systems -- 4 rational use of antibiotics -- 5 Pain management -- 6 The acute abdomen – an overall synopsis -- 7 Upper and lower gastrointestinal bleeding -- 8 Perianal conditions -- 9 Oncological issues that require acute intervention -- 10 Abdominal wall problems -- 11 Breast -- 12 Skin and soft tissue -- 13 Urological emergencies -- 14 Neck swellings -- 15 ENT emergencies -- 16 Trauma primary surveys -- 17 Trauma secondary surveys -- 18 Trauma tertiary surveys -- 19 trauma resuscitation and multidisciplinary care -- 20 acute burns management.

## Sommario/riassunto

This book is aimed at surgeons faced with the immediate management of acute surgical problems in a variety of resource settings. The topics covered are common in both developed and developing countries as well as in tropical and non-tropical settings. The book offers an introduction to trauma, which includes primary, secondary and tertiary surveys, trauma resuscitation, and multidisciplinary care followed by a short section on acute burns management and a discussion of a range of specific surgical topics including various of acute abdomen, upper and lower gastrointestinal bleeding, perianal conditions, oncological issues that require acute intervention, abdominal wall problems, urological emergencies and neck swellings. It also addresses the rational use of antibiotics and medications and the role of high dependency units. Each chapter includes a flow chart algorithm with multiple endpoints that relate to the resource situations available to the surgeon. The book is of interest to clinicians dealing with changes in acute surgery and the increasing disparity between developed and developing countries.
