

1. Record Nr.	UNINA9910484311703321
Titolo	Agent and multi-agent systems : technologies and applications : second KES international symposium, KES-AMSTA 2008 : Incheon, Korea, March 26-28, 2008 : proceedings // Ngoc Thanh Nguyen ... [et al.], (eds.)
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, c2008
ISBN	3-540-78582-5
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (XX, 912 p.)
Collana	Lecture notes in computer science, , 0302-9743 ; ; 4953 LNCS sublibrary. SL 7, Artificial intelligence Lecture notes in artificial intelligence
Altri autori (Persone)	NguyenNgoc Thanh
Disciplina	006.3
Soggetti	Intelligent agents (Computer software) Distributed artificial intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Main Track 1: Methodological Aspects of Agent Systems -- Main Track 2: Agent-Oriented Web Applications -- Main Track 3: Ontology Management -- Main Track 4: Multi-agent Resource Allocation -- Main Track 5: Cooperation, Coordination, and Teamwork -- Main Track 6: Agents for Network Management -- Main Track 7: Multi-agent Learning -- Main Track 8: Mobile Agents -- Main Track 9: Agents in Applications -- Doctoral Track -- Special Session: Self-organization in Multi-agent Systems -- Special Session: Intelligent and Secure Agent for Digital Content Management.
Sommario/riassunto	Following from the very successful First KES Symposium on Agent and Multi-Agent Systems – Technologies and Applications (KES-AMSTA 2007), held in Wroclaw, Poland, 31 May–1 June 2007, the second event in the KES-AMSTA symposium series (KES-AMSTA 2008) was held in Incheon, Korea, March 26–28, 2008. The symposium was organized by the School of Computer and Information Engineering, Inha University, KES International and the KES Focus Group on Agent and Multi-agent Systems. The KES-AMSTA Symposium Series is a sub-series of the KES Conference Series. The aim of the symposium was to provide an

international forum for scientific research into the technologies and applications of agent and multi-agent systems. Agent and multi-agent systems are related to the modern software which has long been recognized as a promising technology for constructing autonomous, complex and intelligent systems. A key development in the field of agent and multi-agent systems has been the specification of agent communication languages and formalization of ontologies. Agent communication languages are intended to provide standard declarative mechanisms for agents to communicate knowledge and make requests of each other, whereas ontologies are intended for conceptualization of the knowledge domain. The symposium attracted a very large number of scientists and practitioners who submitted their papers for nine main tracks concerning the methodology and applications of agent and multi-agent systems, a doctoral track and two special sessions.
