| Edizione | [1st ed. 2019.] |
| Descrizione fisica | 1 online resource (413 pages) |
| Collana | Advances in Intelligent Systems and Computing, , 2194-5365 ; ; 909 |
| Disciplina | 371.3344678 371.334 |
| Soggetti | Computational intelligence Telecommunication Computational Intelligence Communications Engineering, Networks |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Sommario/riassunto | This book discusses and assesses the latest trends in the interactive mobile field, and presents the outcomes of the 12th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2018), which was held in Hamilton, Canada on October 11 and 12, 2018. Today, interactive mobile technologies are at the core of many – if not all – fields of society. Not only does the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions coming out practically every day are further strengthening this trend. Since its inception in 2006, the conference has been devoted to highlighting new approaches in interactive mobile technologies with a focus on learning. The IMCL conferences have since established themselves as a valuable forum for exchanging and discussing new research results and relevant trends, as well as practical experience and best-practice examples. This book contains papers in the fields of: Interactive Collaborative Mobile Learning Environments Mobile Health |

Care Training Game-based Learning Design of Internet of Things (IoT)
Devices and Applications Assessment and Quality in Mobile Learning.
Its potential readership includes policymakers, educators and
researchers in pedagogy and learning theory, schoolteachers, the
learning industry, further education lecturers, etc.
