Soggetti	International Political Economy Energy Policy, Economics and Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1 Background -- Chapter 2 Oil situation along with “the Belt and Road Initiative” and within GCC countries -- Chapter 3 Energy cooperation between China and GCC in the context of “the Belt and Road Initiative” -- Chapter 4 Maritime transportation security in the context of “the Belt and Road Initiative” -- Chapter 5 China’s oil reserve from the view of oil supply chain -- Chapter 6 Risk analysis of energy cooperation between China and GCC under geopolitical view -- Chapter 7 Build joint oil stockpiling between GCC and China under “the Belt and Road Initiative” -- Chapter 8 Energy diplomacy and cooperation on oil stockpiling between China and GCC -- Chapter 9 Strategic thinking on energy cooperation between China and GCC under “the Belt and Road Initiative” -- Chapter 10 Conclusions and policy recommendations.
Sommario/riassunto	This book not only discusses how to further deepen the oil cooperation relations between China and the Gulf Council Countries in the context of “the Belt and Road Initiative”, but also investigates how to ensure the security of the entire oil supply chain including oil supply, oil transportation channels, oil demand, and petroleum reserves in China. Further, it examines a novel, win-win oil cooperation between China and the GCC countries, known as joint oil stockpiling. The results presented offer guidance for similar energy cooperation between China and other energy producing countries and also provide a new

perspective on how to improve the research on and understanding of China's energy security issues and multi-lateral energy cooperation issues, making the book of particular interest to engineers and scientists in the field of energy, international relations, and oil stockpiling enterprises.
