1.	Record Nr.	UNINA9910484339703321
	Titolo	Computer Science – Theory and Applications : 11th International Computer Science Symposium in Russia, CSR 2016, St. Petersburg, Russia, June 9-13, 2016, Proceedings / / edited by Alexander S. Kulikov, Gerhard J. Woeginger
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2016
	ISBN	3-319-34171-5
	Edizione	[1st ed. 2016.]
	Descrizione fisica	1 online resource (XXI, 425 p. 49 illus.)
	Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 9691
	Disciplina	004
	Soggetti	Algorithms Computer science - Mathematics Discrete mathematics Computer science Numerical analysis Machine theory Discrete Mathematics in Computer Science Theory of Computation Numerical Analysis Computer Science Logic and Foundations of Programming Formal Languages and Automata Theory
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Algorithms and data structures -- Combinatorial optimization -- Constraint solving -- Computational complexity -- Cryptography -- Combinatorics in computer science -- Formal languages and automata -- Computational models and concepts -- Algorithms for concurrent and distributed systems, networks -- Proof theory and applications of logic to computer science -- Model checking -- Automated reasoning -- Deductive methods.
	Sommario/riassunto	This book constitutes the proceedings of the 11th International Computer Science Symposium in Russia, CSR 2016, held in St.

Petersburg, Russia, in June 2016. The 28 full papers presented in this volume were carefully reviewed and selected from 71 submissions. In addition the book contains 4 invited lectures. The scope of the proposed topics is quite broad and covers a wide range of areas such as: include, but are not limited to: algorithms and data structures; combinatorial optimization; constraint solving; computational complexity; cryptography; combinatorics in computer science; formal languages and automata; computational models and concepts; algorithms for concurrent and distributed systems, networks; proof theory and applications of logic to computer science; model checking; automated reasoning; and deductive methods.
