1. Record Nr. UNINA9910484346103321

Titolo	Computational science and its applications - ICCSA 2006 : international conference, Glasgow, UK, May 8-11, 2006 : proceedings. Part III / / Marina Gavrilova ... [et al.] (eds.)
Pubbl/distr/stampa	Berlin ; ; New York, : Springer, c2006
ISBN	3-540-34076-9
Edizione	[1st ed. 2006.]
Descrizione fisica	1 online resource (XXV, 1243 p.)
Collana	Lecture notes in computer science, , 0302-9743 ; ; 3982 LNCS sublibrary. SL 1, Theoretical computer science and general issues Computational science and its applications - ICCSA 2006 : international conference, Glasgow, UK, May 8-11, 2006 : proceedings ; ; pt. 3
Altri autori (Persone)	GavrilovaMarina L
Disciplina	004
Soggetti	Computer science Computational complexity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Workshop on Approaches or Methods of Security Engineering (AMSE 2006, Sess. A) -- Workshop on Applied Cryptography and Information Security (ACIS 2006) -- Workshop on Internet Communications Security (WICS 2006) -- Workshop on Optimization: Theories and Applications (OTA 2006) -- General Tracks -- Erratum.
Sommario/riassunto	This ?ve-volume set was compiled following the 2006 International Conference on Computational Science and its Applications, ICCSA 2006, held in Glasgow, UK, during May 8–11, 2006. It represents the outstanding collection of almost 664 refereed papers selected from over 2,450 submissions to ICCSA 2006. Computational science has ? rmly established itself as a vital part of many scienti?c investigations, a? ecting researchers and practitioners in areas ranging from applications such as aerospace and automotive, to emerging technologies such as bioinformatics and nanotechnologies, to core disciplines such as ma- ematics, physics, and chemistry. Due to the shear size of many challenges in computational science, the use of supercomputing, parallel processing, and - phisticated algorithms is inevitable and becomes a part of fundamental theore- cal research as well as endeavors in emerging ?elds. Together, these far-reaching scienti?c

areas contributed to shaping this conference in the realms of state--the-art computational science researchand applications, encompassing the fac- itating theoretical foundations and the innovative applications of such results in other areas.
