

1. Record Nr.	UNINA9910484350803321
Titolo	Internet of Things and big data applications : recent advances and challenges // editors, Valentina E. Balas, Vijender Kumar Solanki, Raghendra Kumar
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-39119-1
Edizione	[1st edition 2020.]
Descrizione fisica	1 online resource (283 pages)
Collana	Intelligent Systems Reference Library, , 1868-4394 ; ; 180
Disciplina	004.678
Soggetti	Big data Internet of things
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Optimized cost reduced Parallel Processing methodology for implementing effective big data Analytics -- Big Data & Machine Learning for Evaluating Machine Translation -- Utilization of Internet of Things in Health Care Information System -- IoT, Big Data, Blockchain and Machine Learning besides its transmutation with Modern Technological Applications.
Sommario/riassunto	This book provides essential future directions for IoT and Big Data research. Thanks to rapid advances in sensors and wireless technology, Internet of Things (IoT)-related applications are attracting more and more attention. As more devices are connected, they become potential components for smart applications. Thus, there is a new global interest in these applications in various domains such as health, agriculture, energy, security and retail. The main objective of this book is to reflect the multifaceted nature of IoT and Big Data in a single source. Accordingly, each chapter addresses a specific domain that is now being significantly impacted by the spread of soft computing.
