## Sommario/riassunto

The contributions, composed in this volume, are inspired not only by the necessity but also by the potentialities of a process which continues and deepens cross-cultural understanding, especially between Islamic and Western philosophy. Following the tradition of an East-Western symphony of thoughts, the authors focus on common horizons and while applying comparative and historical approaches, varieties of unity appear on the ways towards a New Enlightenment. The creative force, orchestrating the harmony in the web of Life, communicates in the mean time with the capacities of human beings, advancing in deciphering its micro-macrocosmic dimensions. Here, the encounter of the Logos of Life Philosophy (A-T. Tymieniecka) and Islamic Philosophy open the space for constructive disputation. In the wake of the crisis of postmodern unknowability, paths towards a new critique of reason go hand in hand with fundamental issues, being reflected newly.
