| Sommario/riassunto | Master Advanced Business Application Programming (ABAP) Development Tools by installing, customizing, and using them in Eclipse. The book begins by describing the installation and customization of ABAP Development Tools in Eclipse and how to adjust the IDE to meet your requirements. You will discover the ABAP Development Tools functionality that helps you be more efficient in programming in the ABAP language, including refactoring, markers, quick fixes, unit testing, and much more. Moving on, you will cover the available Eclipse plugins that you can use with ABAP Development Tools to make Eclipse even more developer-friendly: ABAP Continuous Integration and ABAP Extensions. Finally, you will learn how to create your own Eclipse plugin that is integrated with ABAP Development Tools. This book is perfect for every ABAP developer who wants to get started with ABAP Development Tools in Eclipse, as well as experienced ADT users who would like to take advantage of hidden functions or external extensions for ADT and Eclipse. You will: Install and configure your ABAP in Eclipse to meet your personal requirements Discover the |

functionalities of ABAP in Eclipse that will accelerate your development
Use additional extensions to make your work with Eclipse more
enjoyable Create your own plugin that works with ABAP in Eclipse.
