

1. Record Nr.	UNINA9910484444003321
Titolo	Sustainable birth in disruptive times // edited by Kim Gutschow, Robbie Davis-Floyd, and Betty-Anne Daviss
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-54775-2
Descrizione fisica	1 online resource (339 pages) : illustrations
Collana	Global Maternal and Child Health
Disciplina	618.9200231
Soggetti	Maternity nursing Pediatric nursing Infermeria maternoinfantil Infermeria pediàtrica Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Intro -- Acknowledgments -- Contents -- About the Editors and Contributors -- Editors -- Contributors -- List of Acronyms -- Chapter 1: Introduction: Sustainable Birth in Disruptive Times -- 1.1 Sustainability and Disruption -- 1.2 Evidence-Based Consensus on Maternal and Newborn Health -- 1.3 How the Models in This Volume Promote Maternal Health -- 1.4 How Our Volume Promotes the Midwifery Model of Care and Supports Marginalized Groups -- 1.5 How We Promote Newborn Health and Survival -- 1.6 Counting Maternal and Neonatal Mortality in Our Case Countries -- 1.7 Conclusion: The Three Sections of Our Volume -- Appendix: The 7 Foundational Principles and 12 Steps of the International Childbirth Initiative (ICI): Promoting MotherBaby-Family Maternity Care -- The ICI 12 Steps to Safe and Respectful MotherBaby-Family Maternity Care -- References -- Part I: Sustainable Maternity Solutions in High-Income Countries -- Chapter 2: Sustainable Midwifery -- 2.1 Three Models of Care: Holistic, Humanistic, and Technocratic -- 2.2 Midwifery Education and the Three Models of Care: Technocratic, Humanistic, and Holistic -- 2.3 Practicing Holistic Midwifery Care -- 2.4 Holistic

Care: Oxytocin, Theta, and Trauma -- 2.5 Holistic Midwifery: A Case Study -- References -- Chapter 3: Bringing Back Breech by Reframing the Language of Risk -- 3.1 Introduction: The Language of Risk vs. the Language of Rights -- 3.2 Regenerating Focus on the Normal in Breech Birth -- 3.3 Three Themes, Three Proven Elements, and Three Categories of Sustainable Breech Birth Models -- 3.3.1 Three Proven Elements of Sustainable Breech Delivery Models -- 3.3.2 The Three Categories of Vaginal Breech Delivery in Facilities -- 3.4 Category A: Breeches Managed by the Midwife, Without Obstetricians Required in the Room.

3.4.1 The Breech Clinic in the Oxford Radcliffe Hospital, NHS Foundation Trust, Oxford, England, Described by Anita Hedditch --

3.4.2 The Breech Clinic in l'Hopital Montfort, Ottawa, Canada, Described by Betty-Anne Daviss --

3.4.3 The Sanctum Natural Birth Center in Hyderabad, India, Described by Vijaya Krishnan --

3.4.4 A Hospital in the North of England, Described by Helen Dresner Barnes --

3.5 Category B: Breeches Managed by the Midwife, with an Obstetrician Required to Be in the Room -- 3.5.1 SeeBaby Midwifery, Atlanta, Georgia, Described by Betty-Anne Daviss --

3.5.2 Hospital of Southern Denmark in Aabenraa, Denmark, Described by Betty-Anne Daviss --

3.6 Category C: Breeches Managed by Obstetricians, with Midwives and/or Doulas as Support --

3.6.1 Goethe Klinikum in Frankfurt, Germany, Described by Betty-Anne Daviss --

3.7 Conclusion: Changing the Focus on Risk -- References -- Chapter 4: From Home to Hospital: Sustainable Transfers of Care in the United States --

4.1 Introduction --

4.2 Transfers of Maternity Care: Who, When, Why, and to What End? --

4.3 A Sustainable and Humanized Approach to Transfers of Care --

4.3.1 Maintain the Pregnant Client's Support Personnel --

4.3.2 Avoid Unnecessary Replication of Tests and Procedures --

4.3.3 Limit Obstetric Interventions to Those Medically Indicated and Desired by the Pregnant Client --

4.3.4 Eliminate the Fragmentation of Care Between Sites and Providers During Transfers of Care --

4.4 Further Considerations --

4.5 Conclusion -- References -- Chapter 5: Structures for Sustainable Collaboration Between Midwives and Obstetricians in the Netherlands: The Obstetric and Midwifery Manual and Perinatal Care Partnerships --

5.1 The Collaborative Dynamic Among Midwives and Obstetricians --

5.2 Organization of Maternity Care in the Netherlands --

5.3 The Dutch Obstetric and Midwifery Manual.

5.3.1 The Obstetric Indications List in Everyday Midwifery Practice --

5.4 Perinatal Care Partnerships --

5.4.1 Two Board Meetings of a Perinatal Care Partnership --

5.5 The Dutch Obstetric and Midwifery Manual --

5.6 Perinatal Care Partnerships --

5.7 Conclusion: Is the Dutch System of Home Birth and Autonomous Midwifery Sustainable? --

References -- Chapter 6: Re/Envisioning Birth Work: Community-Based Doula Training for Low-Income and Previously Incarcerated Women in the United States --

6.1 Introduction --

6.2 Racial Disparities in Birth Outcomes --

6.2.1 Doulas and Better Birth Outcomes --

6.3 The East Bay Community Birth Support Project --

6.4 The Experiences of Doula Trainees and the Impact of Doula Training --

6.5 Negotiating Birthing Spaces --

6.6 Reflecting on Changes in Network --

6.6.1 Empowerment --

6.7 Challenges to Sustainability --

6.7.1 "This is Where My Heart Lies, but Realistically Speaking I Can't Do It": Money as Barrier --

6.7.2 "I'm Down for Birth": Making It Work --

6.7.3 "I Could Be Part of the Solution": Doulas Envisioning Their Role in Systemic Change --

6.8 Conclusions: The "Roots of Labor Collective" and Policy Implications --

6.8.1 Medicaid Coverage of Doula Care --

6.8.2 "A Starter Kit

to Your Baby": Doula Care as an Institutionalized Social Service -- 6.8.3 Vocational Training for Previously Incarcerated Women -- References -- Chapter 7: Sustainable Metrics: Using Measurement-Based Quality Improvement to Improve Maternity Practice While Avoiding Frustration and Pitfalls -- 7.1 Introduction -- 7.2 Maternal Care QI: A Recent Focus -- 7.3 Key Organizations and Advances in Maternal Care Quality Measurement -- 7.3.1 National Organizations -- 7.3.2 The State Level -- 7.3.3 Advances in Maternal Care Quality Measurement -- 7.4 Design Considerations -- 7.4.1 Designing an Actionable Problem. 7.4.2 Additional Design Considerations for Quality Measures -- 7.4.3 Data Issues -- 7.4.4 Clinician Burden -- 7.5 Identifying and Addressing Common Pitfalls -- 7.5.1 Infrastructure Pitfalls -- 7.5.2 Methodological Pitfalls -- 7.6 Conclusions -- References -- Chapter 8: Unsustainable Surrogacy Practices: What We Can Learn from a Comparative Assessment -- 8.1 Introduction: Questions About Surrogacy -- 8.2 Methods -- 8.3 The Regulatory Context -- 8.4 Elements of Sustainable Surrogacy -- 8.4.1 Standardization and Regulation of Contracts -- 8.4.2 Mandated Screening of Intended Parents -- 8.4.3 The Open Surrogacy Relationship -- 8.5 Summary and Conclusion: A Call to Rethink US Surrogacy Regulation -- References -- Part II: Sustainable Maternity Solutions in Latin America -- Chapter 9: Childbirth in Chile: Winds of Change -- 9.1 Childbirth Activism -- 9.2 Territories of Birth: The Case of La Florida Hospital -- 9.3 Home Birth -- 9.4 Final Words -- References -- Chapter 10: Humanizing Care at the Maternity Hospital Estela de Carlotto in Buenos Aires: Providers Relearning Their Roles -- 10.1 Sustainable Birth Principle #1: The Importance of a Name -- 10.2 Sustainable Birth Principle #2: Reorganizing Complex Childbirth Care -- 10.3 Sustainable Birth Principle #3: Providers as Protagonists of the Paradigm Shift -- 10.4 Sustainable Birth Principle #4: Childbirth in a Sexual and Reproductive Healthcare Setting -- 10.5 Conclusion: A Humanized Model to Deepen and Expand -- References -- Chapter 11: Luna Maya Birth Centers in Mexico: A Network for Femifocal Care -- 11.1 Luna Maya: History and Context -- 11.2 The Landscape of Maternal Health in Mexico -- 11.3 Luna Maya Vision and Mission: Empowering Women and Communities -- 11.4 Creating a Femifocal Model: Beyond Full Spectrum Care -- 11.4.1 Sustainable Femifocal Care in Action: Case Studies. 11.5 Sustainability for Luna Maya -- 11.6 A Vision Forward: Integrating Birth Centers into a Network -- References -- Chapter 12: Reconstructing Referrals: Overcoming Barriers to Quality Obstetric Care for Maya Women in Guatemala Through Care Navigation -- 12.1 Guatemala and Maternal Mortality -- 12.2 Methodology -- 12.3 Telma -- 12.4 Hospital Bureaucracy and the Failure of Systems of Care -- 12.5 A Solution: Patient Accompaniment and Care Navigation -- 12.6 Telma's Story Retold -- References -- Part III: Sustainable Maternity Solutions in Low- and Middle-Income Countries -- Chapter 13: A Sustainable Model of Assessing Maternal Health Needs and Improving Quality of Care During and After Pregnancy -- 13.1 Background -- 13.2 Introduction -- 13.3 Progress on Improving Maternal Health -- 13.4 Maternal Health Indicators and Definitions -- 13.5 Severe Acute Maternal Morbidity -- 13.6 Maternal Morbidity -- 13.7 Quality of Maternity Care -- 13.8 Evidence-Based Care for Mothers and Babies -- 13.9 A Culture of Quality Within Maternity Care -- 13.10 Measures for Sustainable Improvements -- References -- Chapter 14: Sustainable Maternal and Newborn Care in India: A Case Study from Ladakh -- 14.1 Excellent Maternal and Newborn Outcomes at Sonam Norboo Memorial Hospital -- 14.2 Methods -- 14.3 Maternity Care at SNMH -- 14.4 Dr. Padma's Story -- 14.5 Dr. Spalchen's Story -- 14.6 Two Newborn

Outcomes in the Special Newborn Care Unit (SNCU) -- 14.7 Neonatal Care in Ladakh Versus India: Scaling Up -- 14.8 Neonatal Survival: India and the World -- 14.9 Conclusion: Sustainable Newborn and Maternal Care -- References -- Chapter 15: Giving Birth at Home in Resource-Scarce Regions of India: An Argument for Making the Women-Centric Approach of the Traditional Dais Sustainable -- 15.1 Introduction -- 15.2 Methods and Study Areas -- 15.3 Mother's Attitudes Towards Homebirths.  
15.4 Dais' Skills in Normal Births.
