Sommario/riassunto

The rich programme of ICIDS 2009, comprising invited talks, technical presentations and posters, demonstrations, and co-located post-conference workshops clearly underscores the event's status as premier international meeting in the domain. It thereby confirms the decision taken by the Constituting Committee of the conference series to take the step forward: out of the national cocoons of its precursors, ICVS and TIDSE, and towards an itinerant platform reflecting its global constituency. This move reflects the desire and the will to take on the challenge to stay on the lookout, critically reflect upon and integrate views and ideas, findings and experiences, and to promote interdisciplinary exchange, while ensuring overall coherence and maintaining a sense of direction. This is a significant enterprise: The challenges sought are multifarious and must be addressed consistently at all levels. The desire to involve all research communities and stakeholders must be matched by acknowledging the differences in established practises and by providing suitable means of guidance and introduction, exposition and direct interaction at the event itself and of lasting (and increasingly: living) documentation, of which the present proceedings are but an important part.
