Sommario/riassunto	The study of dynamics of institutional change in emerging markets are subjects of great interest in contemporary political economy. The dynamics and quality of institutional change can have significant impacts on the long-run performance of economies, economic growth and development of nations, and play a fundamental role in societies. It provides a comprehensive understanding of legal-economic institutions, and sheds light on the way to global peace by producing a better understanding of the dynamics of historical change. Topics range from institutional uncertainty, hybrid market order and labor market institutions, to good governance of institutions and WTO rules as trade institutions, as well as entrepreneurship and institutional change in emerging markets, and the role of modern technologies.
