

1. Record Nr.	UNINA9910484504803321
Titolo	Fundamental approaches to software engineering : 8th international conference, FASE 2005, held as part of the Joint Conferences on Theory and Practice of Software, ETAPS 2005, Edinburgh, UK, April 4-8, 2005 : proceedings / / Maura Cerioli (ed.)
Pubbl/distr/stampa	Berlin ; ; New York, : Springer-Verlag, 2005
Edizione	[1st ed. 2005.]
Descrizione fisica	1 online resource (XIV, 374 p.)
Collana	Lecture notes in computer science, , 0302-9743 ; ; 3442
Altri autori (Persone)	CerioliMaura
Disciplina	005.1
Soggetti	Software engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Contributions -- Esterel v7: From Verified Formal Specification to Efficient Industrial Designs -- Checking Memory Safety with Blast -- Web Services -- Analyzing Web Service Based Business Processes -- Automatic Conformance Testing of Web Services -- Graph Grammars and Graph Transformations -- Termination Criteria for Model Transformation -- Ensuring Structural Constraints in Graph-Based Models with Type Inheritance -- Modelling Parametric Contracts and the State Space of Composite Components by Graph Grammars -- Components -- Improving the Build Architecture of Legacy C/C++ Software Systems -- Using Scenarios to Predict the Reliability of Concurrent Component-Based Software Systems -- Augmenting UML Models for Composition Conflict Analysis -- A Tool to Automate Component Clustering and Identification -- Product Lines -- Managing Variability Using Heterogeneous Feature Variation Patterns -- Color-Blind Specifications for Transformations of Reactive Synchronous Programs -- Theory -- On the Correspondence Between Conformance Testing and Regular Inference -- Observational Purity and Encapsulation -- Towards a Theory on the Role of Ontologies in Software Engineering Problem Solving -- Code Understanding and Validation -- A Framework for Counterexample Generation and Exploration -- Using Annotations to Check Structural Properties of Classes -- Improving System Understanding via Interactive, Tailorable,

Source Code Analysis -- Kaveri: Delivering the Indus Java Program Slicer to Eclipse -- The UML -- Non-local Choice and Beyond: Intricacies of MSC Choice Nodes -- Coverage Criteria for Testing of Object Interactions in Sequence Diagrams -- Tools for Secure Systems Development with UML: Security Analysis with ATPs -- Maintaining Life Perspectives During the Refinement of UML Class Structures -- Automatic Proofs and Provers -- Automated Compositional Proofs for Real-Time Systems -- Iterative Circular Coinduction for CoCasl in Isabelle/HOL -- Formalisation and Verification of Java Card Security Properties in Dynamic Logic.

Sommario/riassunto

ETAPS 2005 was the eighth instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised five conferences (CC, ESOP, FASE, FOSSACS, TACAS), 17 satellite workshops (AVIS, BYTECODE, CEES, CLASE, CMSB, COCV, FAC, FESCA, FINCO, GCW-DSE, GLPL, LDTA, QAPL, SC, SLAP, TGC, UITP), seven invited lectures (not including those that were specific to the satellite events), and several tutorials. We received over 550 submissions to the five conferences this year, giving acceptance rates below 30% for each one. Congratulations to all the authors who made it to the final program! I hope that most of the other authors still found a way of participating in this exciting event and I hope you will continue submitting. The events that comprise ETAPS address various aspects of the system development process, including specification, design, implementation, analysis and improvement. The languages, methodologies and tools which support these activities are all well within its scope. Different blends of theory and practice are represented, with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.
