

1. Record Nr.	UNINA9910484517703321
Titolo	Nasopharyngeal cancer : a practical guide on diagnosis and treatment / / Jun Ma, Nancy Y. Lee, Jiade J. Lu, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-65037-5
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (VI, 194 p. 57 illus., 29 illus. in color.)
Collana	Practical Guides in Radiation Oncology, , 2522-5715
Disciplina	616.99432
Soggetti	Nasopharynx - Cancer Rinofaringe Càncer Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1.Diagnosis Staging of Nasopharyngeal Cancer -- 2.Contouring Methods and Atlas of Organs at Risk -- 3.Management of neck disease in early stage disease -- 4.Multimodality Management for Locally Advanced Nasopharyngeal Cancer -- 5.Intensity-modulated radiation therapy for Nasopharyngeal Cancer -- 6.Particle beam radiation therapy for Nasopharyngeal Cancer -- 7.Treatment of Metastatic Nasopharyngeal Cancer -- 8.Salvage radiation therapy for locally recurrent Nasopharyngeal Cancer -- 9.The Use of the EBV Blood Test in Clinical Management Decision -- 10.Management of Radiotherapy Induced Acute Toxicities -- 11.Management of Radiation-induced Late Complications and Evidence-based Surveillance for Nasopharyngeal Carcinoma -- 12.Special Consideration in Pediatric Nasopharyngeal Cancer.
Sommario/riassunto	This book provides up-to-date guidance that will assist radiation oncologists during the day-to-day management of nasopharyngeal cancer. After discussion of diagnosis and staging, target delineation techniques and treatment planning are described for both intensity-modulated and particle radiation therapy. Detailed information is then presented on the application of radiation therapy in different disease

settings, from early stage disease to metastatic disease. Due attention is paid to the role of multimodality treatment and new and advanced technologies in particular circumstances, such as local recurrence. In addition, follow-up and the management of late toxicities are explained and management strategies are documented for special situations and groups, including pediatric patients. The book is published within the Springer series Practical Guides in Radiation Oncology. Like other volumes in the series, it is designed for hands-on use by both radiation oncology residents and practicing radiation oncologists. It will also be of value for head and neck physicians.
