Sommario/riassunto	This volume of "Studies in Law, Politics, and Society" presents a diverse array of interdisciplinary research. It contains articles by scholars from political science, sociology, and law. These articles examine the legal treatment of 'suspect' populations, the work of legal actors, and the

works of various legal devices. Taken together the work published in this volume exemplifies the kind exciting and innovative work now being done by legal scholars from different disciplines. This book contains contributions from law and society scholars from political science, anthropology, sociology, and law and a comprehensive assessment of the state-of-the-field, its past, and its trajectory for the future.

## Sommario/riassunto

This book is the first attempt to introduce the current status of archival practices in Japan as well as the basic views of the populace on making records accessible to English readers. In general, Japan has not paid sufficient attention to keeping and utilizing records except in the field of historical research. This book thus examines Japanese attitudes about history, records management, information acts, the status of archivists of the constitution, and genealogical research practices and a description of archives. Consequently, such investigations clarify how both private and public archives function or fail to do so in those spheres of Japanese society. In addition, this book presents the efforts in wartime record keeping in Australia, which is significantly different from how the Japanese deal with such records. This book therefore provides a clear and concrete picture of the status of current archival practices in Japan and the thinking that underlies them. On the basis of such examinations, this book enables readers to understand to what extent and how the past affects the present through archives, to recognize the importance of archives, and to respect the past in order to maintain and develop perspectives in people's lives.
