

1. Record Nr.	UNINA9910484529603321
Titolo	Distributed, Ambient, and Pervasive Interactions : First International Conference, DAPI 2013, Held as Part of HCI International 2013, Las Vegas, NV, USA, July 21-26, 2013. Proceedings // edited by Norbert Streitz, Constantine Stephanidis
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2013
ISBN	3-642-39351-9
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (XXII, 519 p. 231 illus.)
Collana	Information Systems and Applications, incl. Internet/Web, and HCI, , 2946-1642 ; ; 8028
Disciplina	004.019
Soggetti	User interfaces (Computer systems) Human-computer interaction Interactive multimedia Multimedia systems Application software Computer science Education - Data processing Information storage and retrieval systems User Interfaces and Human Computer Interaction Media Design Computer and Information Systems Applications Models of Computation Computers and Education Information Storage and Retrieval
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Natural interaction -- Context-awareness in smart and intelligent environments -- Design and evaluation of smart and intelligent environments -- Smart cities -- Multi-user group.- Collaborative interaction -- Smart everyday living and working environments.
Sommario/riassunto	This book constitutes the refereed proceedings of the 5th International

Conference on Distributed, Ambient and Pervasive Interactions, DAPI 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 54 contributions was carefully reviewed and selected for inclusion in the DAPI proceedings. The papers are organized in the following topical sections: natural interaction; context-awareness in smart and intelligent environments; design and evaluation of smart and intelligent environments; smart cities; multi-user, group and collaborative interaction; smart everyday living and working environments.
