

1. Record Nr.	UNINA9910484539703321
Titolo	Challenges in mechanics of time-dependent materials . Volume 2 : proceedings of the 2018 Annual Conference on Experimental and Applied Mechanics // Meredith Silberstein, Alireza Amirkhizi, editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-59542-0
Descrizione fisica	1 online resource (vii, 114 pages) : illustrations
Collana	Conference proceedings of the Society for Experimental Mechanics series
Disciplina	620.11292
Soggetti	Materials - Mechanical properties
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- Chapter 1: Characterization of the Viscoelastic Response of Closed-Cell Foam Materials -- 1.1 Introduction -- 1.2 Experimental Methods -- 1.3 Results and Discussion -- 1.4 Conclusion -- References -- Chapter 2: Time-Dependent Yielding of Polymer Thin Films Under Creep -- 2.1 Introduction -- 2.2 Free Volume Nonlinear Viscoelastic Model -- 2.3 Creep Tests -- 2.4 Results and Discussion -- 2.5 Conclusion -- References -- Chapter 3: Non-Newtonian Fluid-Like Behavior of Poly (Ethylene Glycol) Diacrylate Hydrogels Under Transient Dynamic Shear -- 3.1 Introduction -- 3.2 Materials and Methods -- 3.3 Analytical Procedure and Results -- 3.4 Conclusion -- References -- Chapter 4: The Interfacial Shear Strength of Carbon Nanotube Sheet Modified Carbon Fiber Composites -- 4.1 Introduction -- 4.1.1 Surface Wetting -- 4.2 Background -- 4.2.1 Scalable Nanofabrication of CNT Sheet Wrapped Carbon Fiber Composite -- 4.3 Analysis -- 4.3.1 Fiber Push-Out Experiment and FEM Simulations -- 4.3.2 Fiber Push-in Nanoindentation -- 4.4 Conclusion -- References -- Chapter 5: Analytical Assessment of Creep Behavior of European Species in Outdoor Conditions -- 5.1 Context and Problematic -- 5.2 Analytical Modeling of Notched Beam Deflection in 4-Points Bending Test -- 5.2.1 Modeling of the Compliance of Notched Beam -- 5.2.2 Taking into

Account of the Moisture Content (w) Effect -- 5.3 Results and Discussions -- 5.4 Conclusions -- References -- Chapter 6: Room Temperature Stress Relaxation of a Quenched and Tempered Steel -- 6.1 Introduction -- 6.2 Background -- 6.3 Analysis -- 6.4 Conclusion -- References -- Chapter 7: Improved Load Duration in Split Hopkinson (Kolsky) Bar Technique Using a Serpentine Type Striker Bar -- 7.1 Introduction -- 7.2 Striker Bar Design -- 7.3 Dynamic Compression Experiments -- 7.4 Conclusions and Future Work. References -- Chapter 8: Experimental Shear Property Characterization of Agarose Hydrogel and Polydimethylsiloxane (PDMS) -- 8.1 Introduction -- 8.2 Materials and Methods -- 8.3 Results and Discussion -- 8.4 Conclusion -- References -- Chapter 9: Viscoelastoplastic Oxidative Multimode Damage Model for Fibrous Composite Materials at Extreme Temperatures -- 9.1 Kinematic/Kinetic Definitions -- 9.2 Thermodynamics/Constitutive Development -- 9.3 Oxidation Model Description -- 9.4 Conclusion -- References -- Chapter 10: Effect of Thermal and Mechanical Damage on Phase Separation, Crosslink Density, and Polydispersity of Polyurea Variants -- 10.1 Introduction and Background -- 10.2 Polyurea Formulations and Synthesis -- 10.3 ATR-FTIR Characterization -- 10.4 Crosslink Density -- 10.5 Gel Permeation Chromatography (GPC) -- 10.6 Conclusion -- References -- Chapter 11: Time-Resolved Characterization of Taylor Impact Testing -- 11.1 Introduction -- 11.2 Experimental -- 11.3 Results -- 11.4 Conclusion -- References -- Chapter 12: A Novel Method of Validating Polymer Relaxation Using Hopkinson Bar and Quasi-Static Loading -- 12.1 Introduction -- 12.2 Experimental Technique -- 12.3 Material Preparation -- 12.4 Modelling -- 12.5 Results -- 12.6 Conclusion -- References -- Chapter 13: Visco-Elasto-Plastic Characterization of PVC Foams -- 13.1 Introduction -- 13.2 Tested Material -- 13.3 Material Modeling -- 13.4 Results -- 13.5 Conclusions -- References -- Chapter 14: Virtual Dynamic Mechanical Analysis -- 14.1 Introduction -- 14.2 Simulation Method -- 14.3 Test Sample Preparation -- 14.4 Results and Discussion -- 14.5 Conclusions -- Chapter 15: Direct Extraction of Mode I and Mode II Traction-Separation Relationships of Polymer Modified Bitumen Using Rigid Cantilever Beam Experiments Combined with StereoDIC -- 15.1 Introduction -- 15.2 Materials and Methods. 15.2.1 Sample Preparation -- 15.3 Results and Discussion -- 15.4 Conclusions -- References -- Chapter 16: Glass Fiber Composites (GFCs) in Infrastructure: Developing New Measurement Methods to Meet the Challenge of 100 Year Service-Life-Prediction -- 16.1 Introduction -- 16.2 Progress Toward a Realistic Estimate of F-M IFSS (The NIST Approach) -- 16.2.1 Using Automated Data Acquisition to Acquire Tier 1 Data -- 16.2.2 Probing the Effect of Fiber-Fiber Interactions on the Fiber Fragmentation Process -- 16.3 Future Directions -- References.
