

1. Record Nr.	UNINA990004871190403321
Autore	Fitzmaurice-Kelly, Jaime
Titolo	Lecciones de literatura española / por Jaime Fitzmaurice-Kelly ; traducción directa del inglés por Diego Mendoza ; con un prólogo de Rufino José Cuervo
Pubbl/distr/stampa	Madrid, : Libr. General de Victoriano Suárez, 1910
Descrizione fisica	XXI, 326 p. ; 23 cm
Locazione	FLFBC
Collocazione	PA 301
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910484564103321
Titolo	Agent Computing and Multi-Agent Systems : 9th Pacific Rim International Workshop on Multi-Agents, PRIMA 2006, Guilin, China, August 7-8, 2006, Proceedings / / edited by Ramakoti Sadanandana
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2006
ISBN	3-540-36860-4
Edizione	[1st ed. 2006.]
Descrizione fisica	1 online resource (XVII, 827 p.)
Collana	Lecture Notes in Artificial Intelligence, , 2945-9141 ; ; 4088
Altri autori (Persone)	ShiZhongzhi SadanandaR. <1944->
Disciplina	006.3
Soggetti	Artificial intelligence Computer networks Software engineering Computer science Artificial Intelligence Computer Communication Networks Software Engineering Computer Science Logic and Foundations of Programming
Lingua di pubblicazione	Inglese

Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Invited Talks -- Agent Model -- Agent Architectures -- Agent-Oriented Software Engineering -- Agent Grid -- Semantic Web Services -- Collaboration -- Coordination and Negotiation -- Agent Learning -- Peer to Peer Computing -- Applications -- Short Papers.
Sommario/riassunto	<p>PRIMA is a series of workshops on agent computing and multi-agent systems, integrating the activities in Asia and Pacific Rim countries. Agent computing and multi-agent systems are computational systems in which several autonomous or semi-autonomous agents interact with each other or work together to perform some set of tasks or satisfy some set of goals. These systems may involve computational agents that are homogeneous or heterogeneous, they may involve activities on the part of agents having common or distinct goals, and they may involve participation on the part of humans and intelligent agents. The aim of PRIMA 2006 was to bring together Asian and Pacific Rim researchers and developers from academia and industry to report on the latest technical advances or domain applications and to discuss and explore scientific and practical problems as raised by the participants. PRIMA 2006 received 203 submitted papers. Each paper was reviewed by two internationally renowned Program Committee members. After careful reviews, 39 regular papers and 57 short papers were selected for this volume. We would like to thank all the authors who submitted papers to the workshop. We are very grateful to all Program Committee members and reviewers for their splendid work in reviewing the papers. Finally, we thank the editorial staff of Springer for publishing this volume in the Lecture Notes in Artificial Intelligence series.</p>
