Sommario/riassunto	Polycentricity means governance comes from many sources outside the central government, sometimes sparking destructive conflict. Touching on development, polycentric governance, and Islamic and South Asian Studies, this book argues that religiously and historically-grounded shared understandings can support productive polycentric order in Pakistan and comparable Muslim-majority developing countries.

Sommario/riassunto	This book examines how Shakespeare's plays resurface in current complex TV series. Its four case studies bring together The Tempest and the science fiction-Western Westworld, King Lear and the satirical dynastic drama of Succession, Hamlet and the legal thriller Black Earth Rising, as well as Coriolanus and the political thriller Homeland. The comparative readings ask what new insights the twenty-first-century remediations may grant us into Shakespeare's texts and, vice versa, how Shakespearean returns help us understand topical concerns negotiated in the series, such as artificial intelligence, the safeguarding of democracy, terrorism, and postcolonial justice. This study also

proposes that the dramaturgical seriality typical of complex TV allows insights into the seriality Shakespeare employed in structuring his plays. Discussing a broad spectrum of adaptational constellations and establishing key characteristics of the new adaptational aggregate of serial Shakespeare, it seeks to initiate a dialogue between Shakespeare studies, adaptation studies, and TV studies.
