

1. Record Nr.	UNINA9910484641703321
Autore	Zheng Guofeng
Titolo	The segmentation and representation of translocative motion events in English and Chinese discourse : a contrastive study // Guofeng Zheng
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] Â©2021
ISBN	981-334-037-1
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XVIII, 190 p. 114 illus., 6 illus. in color.)
Disciplina	415
Soggetti	Motion in language Direction in language
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- MEP Principles and the Segmentation and Representation of TME -- Research Design and Data Tagging -- General Statistical Description of English and Chinese TME Constructions -- Contrasting the Representation of TMEs in English and Chinese -- Conclusion.
Sommario/riassunto	This book provides a systematic, contrastive analysis of the segmentation and representation of English and Chinese Translocative Motion Events (TMEs), which possess Macro-Event Property (MEP). It addresses all the issues critical to understanding TMEs in English and Chinese, from event segmentation, MEP principles and the conceptual structure of TMEs and their constituents, to the representation of Actant, Motion, Path and Ground. The book argues that the corpus-based alignment for the TME segmentation in both languages, the parameters of Actant, Motion, Path and Ground and their relevant statistical description are particularly important for understanding English and Chinese TMEs. The linguistic materialization of Actant, Ground, Path and Motion, together with a wealth of tables and figures, offers convincing evidence to support the typological classification of English and Chinese. The book's suggestions regarding the Talmyan bipartite typology and Bohnemeyer's MEP contribute to the advancement of TME studies and language typology, and help learners to understand motion events and English-Chinese typological

similarities and differences.
