Sommario/riassunto	This landmark book is concerned with the civil power of the news. This power can be seen in the ways the news engages with public sentiment through a focus on three invariant civil concerns: identity, legitimacy and risk. The book analyses how news stories engage with these concerns to make civil and anti-civil judgements, which influence public sentiment and determine the boundaries we place and maintain around the society we live in. Through historical and contemporary examples of this boundary shaping and maintenance, The Civil Power

of the News presents a bold and original account of the architecture of news, the influence it has on our conceptions of civility, and, ultimately, the power it wields.
