

1. Record Nr.	UNINA9910484685103321
Autore	Grundmann Wolfgang
Titolo	Fallorientierte Bankbetriebswirtschaft : Mittels bankpraktischer Aufgabenstellungen BBWL verstehen und umsetzen // von Wolfgang Grundmann, Corinna Heinrichs
Pubbl/distr/stampa	Wiesbaden : , : Springer Fachmedien Wiesbaden : , : Imprint : Springer Gabler, , 2017
ISBN	3-658-18806-5
Edizione	[2nd ed. 2017.]
Descrizione fisica	1 online resource (X, 388 S.)
Disciplina	336
Soggetti	Finance, Public Finance Public Economics Finance, general
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Das Konto -- Zahlungsformen -- Geldanlage auf Konten -- Geldanlage in Wertpapieren -- Kreditgeschäft.
Sommario/riassunto	Dieses Buch vermittelt den Auszubildenden von Anfang an ein fallorientiertes Verständnis der Bankbetriebswirtschaftslehre. Alternativ zu traditionellen Lehrbüchern lernen sie den Stoff aus seiner Anwendung heraus anhand von Fallstudien. Die Kombination aus Sach- und Fachinhalten, Strukturwissen und korrespondierendem Anwendungsfall macht es leicht, die theoretischen Inhalte auf Handlungssituationen zu übertragen und anzuwenden. So werden den Auszubildenden die komplexen Zusammenhänge schneller transparent gemacht. Zudem gewinnen sie die notwendige Sicherheit in Problem- und Entscheidungssituationen der Bankpraxis. Durch Lösung der Aufgaben und Fallsituationen vertiefen die Auszubildenden ihr praktisches Verständnis der theoretischen Inhalte. Die Inhalte dieses Buches sind dem Rahmenlehrplan sowie dem Prüfungskatalog der Industrie- und Handelskammer des Ausbildungsberufes Bankkaufmann/Bankkauffrau entnommen. Für diese zweite Auflage wurden die Inhalte vollständig überarbeitet und auf den aktuellen rechtlichen Stand gebracht. Der Inhalt • Das Konto • Zahlungsformen •

Geldanlage auf Konten • Geldanlage in Wertpapieren • Kreditgeschäft
 Die Autoren Wolfgang Grundmann besitzt eine 35-jährige
 Unterrichtserfahrung in Bankfachklassen der Handelsschule
 Weidenstieg in Hamburg. Er ist langjähriges Prüfungsausschuss-
 Mitglied der dortigen Handelskammer, Autor erfolgreicher
 Prüfungsbücher für auszubildende Bankkaufleute sowie Mitglied des
 Redaktionsteams der Zeitschrift BANKFACHKLASSE. Dr. Corinna
 Heinrichs ist Studienrätin an der Beruflichen Schule für Banken,
 Versicherungen und Recht in Hamburg.

2. Record Nr.	UNINA9910484174703321
Titolo	Advances in Knowledge Discovery and Data Mining : 19th Pacific-Asia Conference, PAKDD 2015, Ho Chi Minh City, Vietnam, May 19-22, 2015, Proceedings, Part I // edited by Tru Cao, Ee-Peng Lim, Zhi-Hua Zhou, Tu-Bao Ho, David Cheung, Hiroshi Motoda
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-18038-X
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (XXX, 763 p. 224 illus.)
Collana	Lecture Notes in Artificial Intelligence, , 2945-9141 ; ; 9077
Disciplina	006.312
Soggetti	Data mining Artificial intelligence Information storage and retrieval systems Data Mining and Knowledge Discovery Artificial Intelligence Information Storage and Retrieval
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di contenuto	Social Networks and Social Media -- Maximizing Friend-Making Likelihood for Social Activity Organization -- What Is New in Our City? A Framework for Event Extraction Using Social Media Posts -- Link Prediction in Aligned Heterogeneous Networks -- Scale-Adaptive Group

Optimization for Social Activity Planning -- Influence Maximization Across Partially Aligned Heterogeneous Social Networks -- Multiple Factors-Aware Diffusion in Social Networks -- Understanding Community Effects on Information Diffusion -- On Burst Detection and Prediction in Retweeting Sequence -- Few Things About Idioms: Understanding Idioms and Its Users in the Twitter Online Social Network -- Retweeting Activity on Twitter: Signs of Reception -- Resampling-Based Gap Analysis for Detecting Nodes with High Centrality on Large Social Network -- Classification -- Double Ramp Loss Based Reject Option Classifier -- Efficient Methods for Multi-label Classification -- A Coupled k-Nearest Neighbor Algorithm for Multi-label Classification -- Learning Topic-Oriented Word Embedding for Query Classification -- Reliable Early Classification on Multivariate Time Series with Numerical and Categorical Attributes -- Distributed Document Representation for Document Classification -- Prediction of Emergency Events: A Multi-Task Multi-Label Learning Approach -- Nearest Neighbor Method Based on Local Distribution for Classification -- Immune Centroids Over-Sampling Method for Multi-Class Classification -- Optimizing Classifiers for Hypothetical Scenarios -- Repulsive-SVDD Classification -- Centroid-Means-Embedding: an Approach to Infusing Word Embeddings into Features for Text Classification -- Machine Learning -- Collaborating Differently on Different Topics: A Multi-Relational Approach to Multi-Task Learning -- Multi-Task Metric Learning on Network Data -- A Bayesian Nonparametric Approach to Multilevel Regression -- Learning Conditional Latent Structures from Multiple Data Sources -- Collaborative Multi-view Learning with Active Discriminative Prior for Recommendation -- Online and Stochastic Universal Gradient Methods for Minimizing Regularized Hölder Continuous Finite Sums in Machine Learning -- Context-Aware Detection of Sneaky Vandalism on Wikipedia Across Multiple Languages -- Uncovering the Latent Structures of Crowd Labeling -- Use Correlation Coefficients in Gaussian Process to Train Stable ELM Models -- Local Adaptive and Incremental Gaussian Mixture for Online Density Estimation -- Latent Space Tracking from Heterogeneous Data with an Application for Anomaly Detection -- A Learning-Rate Schedule for Stochastic Gradient Methods to Matrix Factorization -- Applications -- On Damage Identification in Civil Structures Using Tensor Analysis -- Predicting Smartphone Adoption in Social Networks -- Discovering the Impact of Urban Traffic Interventions Using Contrast Mining on Vehicle Trajectory Data -- Locating Self-collection Points for Last-mile Logistics using Public Transport Data -- A Stochastic Framework for Solar Irradiance Forecasting Using Condition Random Field -- Online Prediction of Chess Match Result -- Learning of Performance Measures from Crowd-Sourced Data with Application to Ranking of Investments -- Hierarchical Dirichlet Process for Tracking Complex Topical Structure Evolution and its Application to Autism Research Literature -- Automated Detection for Probable Homologous Foodborne Disease Outbreaks -- Identifying Hesitant and Interested Customers for Targeted Social Marketing -- Activity-Partner Recommendation -- Iterative Use of Weighted Voronoi Diagrams to Improve Scalability in Recommender Systems -- Novel Methods and Algorithms Principal Sensitivity Analysis -- SocNL: Bayesian Label Propagation with Confidence -- An Incremental Local Distribution Network for Unsupervised Learning -- Trend-Based Citation Count Prediction for Research Articles -- Mining Text Enriched Heterogeneous Citation Networks -- Boosting via Approaching Optimal Margin Distribution -- o-HETM: An Online Hierarchical Entity TopicModel for News Streams --

Modeling User Interest and Community Interest in Microbloggings: An Integrated Approach -- Minimal Jumping Emerging Patterns: Computation and Practical Assessment -- Factorisation -- An Empirical Study of Personal Factors and Social Effects on Rating Prediction.

Sommario/riassunto

This two-volume set, LNAI 9077 + 9078, constitutes the refereed proceedings of the 19th Pacific-Asia Conference on Advances in Knowledge Discovery and Data Mining, PAKDD 2015, held in Ho Chi Minh City, Vietnam, in May 2015. The proceedings contain 117 paper carefully reviewed and selected from 405 submissions. They have been organized in topical sections named: social networks and social media; classification; machine learning; applications; novel methods and algorithms; opinion mining and sentiment analysis; clustering; outlier and anomaly detection; mining uncertain and imprecise data; mining temporal and spatial data; feature extraction and selection; mining heterogeneous, high-dimensional, and sequential data; entity resolution and topic-modeling; itemset and high-performance data mining; and recommendations.
