Sommario/riassunto	Social work practice with refugees and immigrants requires specialized knowledge of these populations, and specialized adaptations and applications of mainstream services and interventions. Because they are often confronted with cultural, linguistic, political, and socioeconomic barriers, these groups are especially vulnerable to psychological problems. Among these problems are anxiety, depression, alienation, grief, even post-traumatic stress disorder, as well as biological concerns stemming from inadequate or underutilized medical services. Best Practices for Social Work with Refugees and Im
