

1. Record Nr.	UNISALENT0991001365199707536
Autore	Mioni, Elpidio
Titolo	Aristotelis codices graeci qui in bibliothecis venetis adservantur / recognovit adnotatione critica instruxit Elpidius Mioni
Pubbl/distr/stampa	Padova : Antenore, 1958
Descrizione fisica	162 p. ; 22cm
Collana	Miscellania erudita ; 6
Disciplina	091
Soggetti	Biblioteche - Veneto - Manoscritti aristotelici Aristotele Opere Manoscritti Cataloghi Aristotele Opere Manoscritti Cataloghi
Lingua di pubblicazione	Latino
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910484692303321
Titolo	Logical Foundations of Computer Science : International Symposium, LFCS 2020, Deerfield Beach, FL, USA, January 4–7, 2020, Proceedings / / edited by Sergei Artemov, Anil Nerode
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-36755-X
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (297 pages)
Collana	Theoretical Computer Science and General Issues, , 2512-2029 ; ; 11972
Disciplina	003.54 004
Soggetti	Mathematical logic Machine theory Artificial intelligence Mathematical Logic and Foundations Formal Languages and Automata Theory Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Computability of Algebraic and Definable Closure -- Observable Models -- Countermodel Construction via Optimal Hypersequent Calculi for Non-Normal Modal Logics -- Completeness Theorems for First-Order Logic Analysed in Constructive Type Theory -- On the Constructive Truth and Falsity in Peano Arithmetic -- Belief Expansion in Subset Models -- Finitism, Concrete Programs and Primitive Recursion -- Knowledge of Uncertain Worlds: Programming with Logical Constraints -- A Globally Sound Analytic Calculus for Henkin Quantifiers -- Feedback Hyperjump -- Syntactic Cut-Elimination for Intuitionistic Fuzzy Logic via Linear Nested Sequents -- On Deriving Nested Calculi for Intuitionistic Logics from Semantic Systems -- Parameterised Complexity of Abduction in Schaefer's Framework -- Tracking Computability of GPAC-Generable Functions -- Modal Type Theory Based on the Intuitionistic Modal Logic ! --

Lifting Recursive Counterexamples to Higher-Order Arithmetic -- On the Tender Line Separating Generalizations and Boundary-Case Exceptions for the Second Incompleteness Theorem under Semantic Tableaux Deduction.

Sommario/riassunto

This book constitutes the refereed proceedings of the International Symposium on Logical Foundations of Computer Science, LFCS 2020, held in Deerfield Beach, FL, USA, in January 2020. The 17 revised full papers were carefully reviewed and selected from 30 submissions. The scope of the Symposium is broad and includes constructive mathematics and type theory; homotopy type theory; logic, automata, and automatic structures; computability and randomness; logical foundations of programming; logical aspects of computational complexity; parameterized complexity; logic programming and constraints; automated deduction and interactive theorem proving; logical methods in protocol and program verification; logical methods in program specification and extraction; domain theory logics; logical foundations of database theory; equational logic and term rewriting; lambda and combinatory calculi; categorical logic and topological semantics; linear logic; epistemic and temporal logics; intelligent and multiple-agent system logics; logics of proof and justification; non-monotonic reasoning; logic in game theory and social software; logic of hybrid systems; distributed system logics; mathematical fuzzy logic; system design logics; other logics in computer science.
