Sommario/riassunto

This volume contains the proceedings of the 4th International Workshop on Critical Information Infrastructures Security (CRITIS 2009). The workshop was held from September 30 to October 2 in the Gunnewig Hotel Bristol in Bonn, Germany.

The workshop was organized by the Fraunhofer Institute for Intelligent Analysis and Information Systems (IAIS), Sankt Augustin, Germany. CRITIS 2009 continued the series of successful CRITIS Workshops. Companies, research institutions, and governmental organizations from all main areas of critical infrastructures took an active part in supporting CRITIS and we found CRITIS 2009 both exciting and informative. The selected papers addressed a range of key issues and demonstrated the ubiquity and global importance of information infrastructures. Each paper had at least three independent technical reviews and we accepted 13 full papers out of 34 submissions. We were very fortunate in having a range of invited speakers that covered policy, research and industry perspectives. James Smith from Los Alamos National Laboratory addressed the challenges and achievements in their work on "Large-Scale Modeling and Simulation of Critical Infrastructure." Orestis Terzidis, Vice President SAP AG, talked on the "The Internet for Energy: Perspectives and Challenges." Continuing with the energy theme, Alla Heidenreich, from SIEMENS AG, Corporate Research and Technologies (Germany) provided her insights on the "Secure ICT Infrastructure for the Future Power Grid." Critical infrastructure protection is an area where an effective private-public partnership is required. A government perspective was provided by Michael Pergemann, German Minister of the Interior, who talked on German strategy regarding CIIP.
