1.	Record Nr.	UNINA9910484731003321
	Titolo	Information Systems Architecture and Technology: Proceedings of 40th Anniversary International Conference on Information Systems Architecture and Technology – ISAT 2019 : Part II / / edited by Jerzy witek, Leszek Borzemski, Zofia Wilimowska
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
	ISBN	3-030-30604-6
	Edizione	[1st ed. 2020.]
	Descrizione fisica	1 online resource (349 pages)
	Collana	Advances in Intelligent Systems and Computing, , 2194-5357 ; ; 1051
	Disciplina	004.6 004.65
	Soggetti	Computational intelligence Electrical engineering Artificial intelligence Computational Intelligence Communications Engineering, Networks Artificial Intelligence
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Synthesis of no-wait cyclic schedules for cascade-like systems of repetitive processes with fixed periods -- Robust Competence Allocation For Multi-Project Scheduling -- Calculation of labour input in multivariant production with use of simulation -- Production resources utilization improvement with the use of simulation mod-elling -- Numerical studies on the effectiveness of optimization algorithms to identify the parameters of machine tool hybrid body structural component model -- The Use of Knowledge-Based Engineering Systems and Artificial Intelligence in Product Development: A Snapshot.
	Sommario/riassunto	This three-volume book highlights significant advances in the development of new information systems technologies and architectures. Further, it helps readers solve specific research and analytical problems and glean useful knowledge and business value from data. Each chapter provides an analysis of a specific technical

problem, followed by a numerical analysis, simulation, and implementation of the solution to the real-world problem. Managing an organization, especially in today's rapidly changing environment, is a highly complex process. Increased competition in the marketplace, especially as a result of the massive and successful entry of foreign businesses into domestic markets, changes in consumer behaviour, and broader access to new technologies and information, calls for organisational restructuring and the introduction and modification of management methods using the latest scientific advances. This situation has prompted various decision-making bodies to introduce computer modelling of organization management systems. This book presents the peer-reviewed proceedings of the 40th Anniversary International Conference "Information Systems Architecture and Technology" (ISAT), held on September 15–17, 2019, in Wrocaw, Poland. The conference was organised by the Computer Science Department, Faculty of Computer Science and Management, Wroclaw University of Sciences and Technology, and University of Applied Sciences in Nysa, Poland. The papers have been grouped into three major sections: Part I—discusses topics including, but not limited to, artificial intelligence methods, knowledge discovery and data mining, big data, knowledge-based management, Internet of Things, cloud computing and high-performance computing, distributed computer systems, content delivery networks, and service-oriented computing. Part II—addresses various topics, such as system modelling for control, recognition and decision support, mathematical modelling in computer system design, service-oriented systems, and cloud computing, and complex process modelling. Part III—focuses on a number of themes, like knowledge-based management, modelling of financial and investment decisions, modelling of managerial decisions, production systems management, and maintenance, risk management, small business management, and theories and models of innovation.
