| Note generali           | Description based upon print version of record.  |
| Sommario/riassunto      | The interplay between the external world (ching) and the poet's inner world (ch'ing) lies at the heart of Chinese poetry, and understanding the interaction of the two is crucial to understanding this work from within its own tradition. Closely coordinating her discussions of poetry |

and criticism so that practice and theory become mutually enriching and illuminating, Sun offers sensitive and original readings of poems and a wealth of insights into Chinese poetics.

Sommario/riassunto	This book reports on the latest research and developments in the field of cybersecurity, particularly focusing on personal security and new methods for reducing human error and increasing cyber awareness, as

well as innovative solutions for increasing the security of advanced Information Technology (IT) infrastructures. It covers a broad range of topics, including methods for human training; novel cyber-physical and process-control systems; social, economic, and behavioral aspects of cyberspace; issues concerning the cybersecurity index; security metrics for enterprises; and risk evaluation. Based on the AHFE 2018 International Conference on Human Factors in Cybersecurity, held on July 21–25, 2018, in Orlando, Florida, USA, the book not only presents innovative cybersecurity technologies, but also discusses emerging threats, current gaps in the available systems, and future challenges that can be successfully overcome with the help of human factors research.
