Reinhold Boschki, Bettina Reichmann, and Wilhelm Schwendemann -- Epistemological aspects of Holocaust education: Between ideologies and interpretations. Zehavit Gross and Doyle Stevick -- Notes on contributors. .

## Sommario/riassunto

This volume represents the most comprehensive collection ever produced of empirical research on Holocaust education around the world. It comes at a critical time, as the world approaches the 70th anniversary of the liberation of Auschwitz. We are now at a turning

point as the generations that witnessed and survived the Shoah are slowly passing on. Governments are charged with ensuring that this defining event of the 20th century should take its rightful place in the historical consciousness of the world's peoples and their education. The policies and practices of Holocaust education around the world are as diverse as the countries that grapple with its history and its meaning. The effort to reconcile national histories and memories with the international realities of the Holocaust and its implications for the present persists. These efforts take place at a time when scholarship about the Holocaust itself has made great strides. In this book, these issues are framed by some of the leading voices in the field, including Elie Wiesel and Yehuda Bauer, and then explored by many distinguished scholars who represent a wide range of expertise. Holocaust education is of such significance, so rich in meaning, so powerful in content, and so diverse in practice that the need for extensive, high-quality empirical research is critical. This book provides exactly that.
