Titolo	Discovery Science : 20th International Conference, DS 2017, Kyoto, Japan, October 15–17, 2017, Proceedings / / edited by Akihiro Yamamoto, Takuya Kida, Takeaki Uno, Tetsuji Kuboyama
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2017
ISBN	3-319-67786-1
Edizione	[1st ed. 2017.]
Descrizione fisica	1 online resource (XV, 357 p. 90 illus.)
Collana	Lecture Notes in Artificial Intelligence, , 2945-9141 ; ; 10558
Disciplina	501
Soggetti	Artificial intelligence Data mining Application software Social sciences - Data processing Artificial Intelligence Data Mining and Knowledge Discovery Computer and Information Systems Applications Computer Application in Social and Behavioral Sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Preface -- Organization -- Abstracts of Invited Talks -- Machine Learning from Weak Supervision - Towards Accurate Classification with Low Labeling Costs -- Automatic Design of Functional Molecules and Materials -- Contents -- Online Learning -- Context-Based Abrupt Change Detection and Adaptation for Categorical Data Streams -- 1 Introduction -- 2 Background -- 2.1 DILCA Context-Based Similarity Measure -- 2.2 CDCStream Categorical Drift Detector -- 3 FG-CDCStream Algorithm -- 4 Experimentation -- 4.1 Results -- 4.2 Discussion -- 5 Conclusion -- References -- A New Adaptive Learning Algorithm and Its Application to Online Malware Detection -- 1 Introduction -- 2 Related Work -- 2.1 Batch Learning in Malware Detection -- 2.2 Online Learning in Malware Detection -- 3 Problem Statement -- 4 Methodology -- 4.1 Batch Learning -- LR -- 4.2 Online Learning -- FTRL-DP -- 5 Data Collection -- 5.1 Malware

Sommario/riassunto

This book constitutes the proceedings of the 20th International Conference on Discovery Science, DS 2017, held in Kyoto, Japan, in October 2017, co-located with the International Conference on Algorithmic Learning Theory, ALT 2017. The 18 revised full papers presented together with 6 short papers and 2 invited talks in this volume were carefully reviewed and selected from 42 submissions. The scope of the conference includes the development and analysis of methods for discovering scientific knowledge, coming from machine learning, data mining, intelligent data analysis, big data analysis as well as their application in various scientific domains. The papers are organized in topical sections on machine learning: online learning, regression, label classification, deep learning, feature selection, recommendation system; and knowledge discovery: recommendation system, community detection, pattern mining, misc.
