

1. Record Nr.	UNINA9910484818003321
Titolo	Intelligent computing and block chain : first BenchCouncil International Federated Conferences, FICC 2020, Qingdao, China, October 30 - November 3, 2020 : revised selected papers / / Wanling Gao [and nine others], editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2021] ©2021
ISBN	981-16-1160-2
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XVI, 508 p. 196 illus., 140 illus. in color.)
Collana	Communications in computer and information science ; ; 1385
Disciplina	006.3
Soggetti	Artificial intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	AI and Medical Technology -- BLU-GAN: Bi-Directional ConvLSTM U-Net with Generative Adversarial Training for Retinal Vessel Segmentation -- Choroidal Neovascularization Segmentation Based on 3D CNN with Cross Convolution Module -- Task-Free Recovery and Spatial Characterization of a Globally Synchronized Network from Resting-State EEG -- PRU-net: an U-net model with pyramid pooling and residual block for WMH segmentation -- Two-way Perceived Color Difference Saliency Algorithm for Image Segmentation of Port Wine Stains -- A new pathway to explore reliable biomarkers by detecting typical patients with mental disorders -- Activities Prediction of Drug Molecules by Using Automated Model Building with Descriptor Selection -- Survival Prediction of Glioma Tumors Using Feature Selection and Linear Regression -- AI and Big Data -- Root Cause Localization from Performance Monitoring Metrics Data with Multidimensional Attributes -- A Performance Benchmark for Stream Data Storage Systems -- Failure Characterization based on LSTM Networks for Bluegene/L System Logs -- Trac Crowd Congested Scene Recognition Based on Dilated Convolution Network -- Failure Prediction for Large-Scale Clusters Logs via Mining Frequent Patterns -- FLBench: An Isolated Data Island Benchmark Suite for Federated Learning -- Fake news detection using knowledge vector -- A reconfigurable electrical circuit

auto-processing method for direct electromagnetic inversion --
Implementing Natural Language Processes to Natural Language
Programming -- AI and Block Chain -- LSO: A Dynamic and Scalable
Blockchain Structuring Framework -- CISV: A Cross-Blockchain
Information Synchronization and Verification Mode -- A Formal Process
Virtual Machine for EOS-based Smart Contract Security Verification --
AVEI: A Scientific Data Sharing Framework Based on Blockchain -- SCT-
CC: A Supply Chain Traceability System Based on Cross-chain
Technology of Blockchain -- Game-Theoretic Analysis on CBDC
Adoption -- Design of experiment management system for stability
control system based on blockchain technology -- A Cross-chain
Gateway for Efficient Supply Chain Data Management -- AI and
Education Technology -- Automatic essay scoring model based on
multi-channel CNN and LSTM -- Research on Knowledge Graph in
Education Field from the Perspective of Knowledge Graph -- Course
Evaluation Analysis Based on Data Mining and AHP: A case study of
Python courses on MOOC of Chinese universities -- Process-oriented
definition of evaluation indicators, learning behavior collection and
analysis: A case study -- The reform and construction of computer
essential courses in New Liberal Arts aiming at improving Data Literacy
-- Entity Coreference Resolution for Syllabus via Graph Neural Network
-- An Exploration of the Ecosystem of General Education in
Programming -- The New Theory of Learning in the Era of Educational
Information 2.0 Connected Constructivism -- AI and Financial
Technology -- A Stock Index Prediction Method and Trading Strategy
Based on the Combination of Lasso-Grid Search-Random Forest --
Dynamic Copula Analysis of the Effect of COVID-19 Pandemic on Global
Banking Systemic Risk -- Real-Time Order Scheduling in Credit
Factories: A Multi-Agent Reinforcement Learning Approach --
Predicting Digital Currency Price Using Broad Learning System and
Genetic Algorithm -- Selective Multi-source Transfer Learning with
Wasserstein Domain Distance for Financial Fraud Detection.

Sommario/riassunto

This book constitutes the refereed post-conference proceedings of the Second BenchCouncil International Federated Intelligent Computing and Block Chain Conferences, FICC 2020, held in Qingdao, China, in October/ November 2020. The 32 full papers and 6 short papers presented were carefully reviewed and selected from 103 submissions. The papers of this volume are organized in topical sections on AI and medical technology; AI and big data; AI and block chain; AI and education technology; and AI and financial technology.
