1. Record Nr.   UNINA9910484826403321

   Titolo   Architecting systems with trustworthy components : international seminar, Dagstuhl Castle, Germany, December 12-17, 2004 : revised selected papers / / Ralf H. Reussner, Judith A. Stafford, Clemens A. Szyperski (eds.)

   Pubbl/distr/stampa   Berlin, : Springer, 2006

   ISBN   3-540-35833-1

   Edizione   [1st ed. 2006.]

   Descrizione fisica   1 online resource (X, 299 p.)

   Collana   Lecture notes in computer science, , 0302-9743 ; ; 3938
                                LNCS sublibrary. SL 1, Theoretical computer science and general issues

   Altri autori (Persone)   ReussnerRalf H
                                StaffordJudith A (Judith Alyce)
                                SzyperskiClemens A

   Disciplina   005.1

   Soggetti   Computer architecture
                                Computer systems - Reliability
                                Fault-tolerant computing

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   "Dagstuhl Seminar 04511."--p. [vii].

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   Invited Articles -- Audition of Web Services for Testing Conformance to Open Specified Protocols -- A Core Theory of Interfaces and Architecture and Its Impact on Object Orientation -- Making Specifications Complete Through Models -- Bus Scheduling for TDL Components -- Refinement and Consistency in Component Models with Multiple Views -- Articles by Participants -- A Taxonomy on Component-Based Software Engineering Methods -- Unifying Hardware and Software Components for Embedded System Development -- On the Composition of Compositional Reasoning -- Trustworthy Instantiation of Frameworks -- Performance Prediction of Component-Based Systems -- Towards an Engineering Approach to Component Adaptation -- Compatible Component Upgrades Through Smart Component Swapping -- Exceptions in Component Interaction Protocols – Necessity -- Coalgebraic Semantics for Component Systems -- A Type Theoretic Framework for Formal Metamodelling.
