

1. Record Nr.	UNINA9910484863203321
Autore	Ramadas Meera
Titolo	Metaheuristics for Data Clustering and Image Segmentation // by Meera Ramadas, Ajith Abraham
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-04097-6
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (167 pages)
Collana	Intelligent Systems Reference Library, , 1868-4408 ; ; 152
Disciplina	006.3019
Soggetti	Computational intelligence Artificial intelligence Computer vision Algorithms Computational Intelligence Artificial Intelligence Computer Vision
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- METAHEURISTICS AND DATA CLUSTERING -- REVISED MUTATION STRATEGY FOR DIFFERENTIAL EVOLUTION ALGORITHM -- SEARCH strategy Flower Pollination Algorithm with Differential Evolution. .
Sommario/riassunto	In this book, differential evolution and its modified variants are applied to the clustering of data and images. Metaheuristics have emerged as potential algorithms for dealing with complex optimization problems, which are otherwise difficult to solve using traditional methods. In this regard, differential evolution is considered to be a highly promising technique for optimization and is being used to solve various real-time problems. The book studies the algorithms in detail, tests them on a range of test images, and carefully analyzes their performance. Accordingly, it offers a valuable reference guide for all researchers, students and practitioners working in the fields of artificial intelligence, optimization and data analytics.
