Titolo	Management of Nutritional and Metabolic Complications of Bariatric Surgery // edited by Aparna Govil Bhasker, Nimisha Kantharia, Sarfaraz Baig, Pallawi Priya, Mariam Lakdawala, Miloni Shah Sancheti
Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2021
ISBN	981-334-702-3
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (362 pages) : illustrations
Collana	Medicine Series
Disciplina	617.05
Soggetti	Surgery Cirurgia de l'obesitat Metabolisme Nutrició Complicacions (Medicina) Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Prevention of nutritional problems after bariatric surgery -- Early diagnosis of nutritional complications in post-bariatric surgery patients -- Management of vitamin deficiencies after bariatric surgery -- Management of protein deficiency-related complications post-bariatric surgery.-Management of micro-nutrient deficiencies in post-bariatric surgery patients -- Neurological complications seen after bariatric surgery -- Liver related sequelae post-bariatric surgery -- Miscellaneous metabolic consequences post-bariatric surgery.
Sommario/riassunto	This book covers the management of various metabolic, nutritional and hormonal complications that arise after bariatric surgery. Until now bariatric surgeons have focused on mastering the surgical technique and reducing surgical complications. A number of metabolic and nutritional complications in the post-surgical phase can remain undiagnosed or unreported with a potential for irreversible morbidity. The book is edited by a team of experienced surgeons and bariatric nutritionists to provide a balanced perspective on the subject. It includes chapters on the prevention and subsequent diagnosis and

management of these complications early in the course and explaining each complication with one or more suitable case reports. This book is relevant for practicing as well as aspiring bariatric surgeons, nutritionists/dieticians and bariatric physicians.
