

1. Record Nr.	UNINA9910484913403321
Titolo	Carl Friedrich von Weizsäcker: Pioneer of Physics, Philosophy, Religion, Politics and Peace Research // edited by Ulrich Bartosch
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2015
ISBN	3-319-13446-9
Edizione	[1st ed. 2015.]
Descrizione fisica	1 online resource (188 p.)
Collana	SpringerBriefs on Pioneers in Science and Practice, , 2194-3125 ; ; 21
Disciplina	320 5 509 530
Soggetti	History Physics Political science History of Science Physics, general Political Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Carl Friedrich von Weizsäcker'sAutobiography in Reflexion - Soliloquy -- Major Publications Carl Friedrich von Weizsäcker -- Research into the Living Conditions in a World of Science and Technology --Thoughts on the Work Agenda -- Arms Race and Political Responsibility – About the Courage to Admit One's Own Fear -- Limits to a Nuclear Economy -- New Chances for Peace after the End of the Cold War - Conditions of Freedom.
Sommario/riassunto	This book offers a collection of texts by Carl Friedrich von Weizsaecker (1912-2007), a major German universal scientist who was a pioneer in physics, philosophy, religion, politics and peace research. He started as an assistant to the physicist, Werner Heisenberg, held professorships in theoretical physics (Strasbourg), physics (Goettingen) and philosophy (Hamburg) and was a co-director (with Juergen Habermas) of a Max Planck Institute for Research into living conditions in a world of science

and technology in Starnberg. This unique anthology spans the wide scope of his innovative thinking including his philosophical self-reflections, on peace, nuclear strategy, security and defensive defense, on nuclear energy, on the conditions of freedom, on his experience of religion, including poetry from his early youth. Most texts appear in English for the first time and are selected for use in seminars on physics, philosophy, religion, politics and peace research.

2. Record Nr.	UNINA9910300083303321
Titolo	Multiple Myeloma : Diagnosis and Treatment / / edited by Morie A. Gertz, S. Vincent Rajkumar
Pubbl/distr/stampa	New York, NY : , : Springer New York : , : Imprint : Springer, , 2014
ISBN	1-4614-8520-7
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (311 p.)
Disciplina	610 616.15 616.99418 616994
Soggetti	Hematology Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Criteria for Diagnosis and Response -- 2. Detection of M proteins -- 3. Pathology Of Multiple Myeloma -- 4. Pathogenesis of Multiple Myeloma -- 5. Staging of Multiple Myeloma -- 6. Molecular Classification and Risk Stratification -- 7. Monoclonal Gammopathies of Undetermined Significance and Smoldering Multiple Myeloma -- 8. Treatment of Newly Diagnosed Multiple Myeloma -- 9. Approach to Relapsed Refractory Myeloma -- 10. Autologous Stem Cell Transplantation in the Management of Multiple Myeloma -- 11. Allogeneic Stem Cell Transplantation -- 12. New Agents For Multiple Myeloma -- 13. Biological Therapy for Multiple Myeloma -- 14.

Management of Treatment Complications and Supportive Care -- 15. POEMS Syndrome (Takatsuki Syndrome) -- 16. Solitary Plasmacytoma -- 17. Myeloma Bone Disease -- 18. Vertebral Augmentation -- 19. The Role of Radiation Therapy in the Treatment of Multiple Myeloma, Plasmacytoma and Other Plasma Cell Disorders -- 20. Neurologic Complications of Myeloma -- 21. Myeloma Cast Nephropathy -- 22. Amyloidosis -- 23. IgM Multiple Myeloma -- 24. Waldenström's Macroglobulinemia. .

Sommario/riassunto

This is a comprehensive, state-of-the-art guide to the diagnosis, treatment, and biology of multiple myeloma and related plasma disorders. Edited and written by a multidisciplinary group of recognized authorities from the Mayo Clinic, it presents clear guidelines on diagnosis and therapy and covers all aspects of multiple myeloma, from molecular classification and diagnosis, to risk stratification and therapy. Closely related plasma cell disorders such as solitary plasmacytoma, Waldenström macroglobulinemia, and light chain amyloidosis are discussed in detail as well. The book addresses often overlooked topics, including the role of radiation therapy, vertebral augmentation, and supportive care. Our understanding of this group of disorders is developing at an unprecedented rate, and Multiple Myeloma meets the need among oncologists and hematologists for a clear, timely, and authoritative resource on their biology, diagnosis, and treatment.
