Entrepreneurial State and the Public Mission of Higher Education Reinvented: Examining Knowledge Transfer Policies of Hong Kong's Universities and Impact of the Academic Profession -- Chapter 13. Conclusions and Recommendations for Future Research in University's Public Mission. .

Sommario/riassunto

This book covers initiatives related to higher education's public mission such as university-community engagement, knowledge transfer, economic development, and social responsibility, using empirical and conceptual cases in the US, South America, Europe, Africa, and Asia. In order to develop a better understanding of public mission initiatives in higher education across the globe, the volume editors developed a theoretical framework emerging from organizational theory. Each chapter analysis uses both external environmental elements (political, economic, sociocultural, and technological), as well as internal institutional elements (mission, vision, leadership, and governance). Finally, each chapter highlights issues related to implementation and challenges with the intent of prompting readers to consider appropriate ways in which to adopt some of the lessons learned by the contributing authors.
