Nota di bibliografia Includes bibliographical references and author index. Nota di contenuto Trees -- Regular expressions -- Graphs -- Point sets -- Arrays. This book constitutes the refereed proceedings of the 25th Annual Sommario/riassunto Symposium on Combinatorial Pattern Matching, CPM 2014, held in Moscow, Russia, in June 2014. The 28 revised full papers presented together with 5 invited talks were carefully reviewed and selected from

54 submissions. The papers address issues of searching and matching

strings and more complicated patterns such as trees; regular expressions; graphs; point sets; and arrays. The goal is to derive combinatorial properties of such structures and to exploit these

properties in order to achieve superior performance for the corresponding computational problems. The meeting also deals with problems in computational biology; data compression and data mining; coding; information retrieval; natural language processing; and pattern recognition.
