

1. Record Nr.	UNINA9910484960903321
Titolo	Ambient Intelligence – Software and Applications –,10th International Symposium on Ambient Intelligence // edited by Paulo Novais, Jaime Lloret, Pablo Chamoso, Davide Carneiro, Elena Navarro, Sigeru Omatu
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2020
ISBN	3-030-24097-5
Edizione	[1st ed. 2020.]
Descrizione fisica	1 online resource (XV, 226 p. 85 illus., 67 illus. in color.)
Collana	Advances in Intelligent Systems and Computing, , 2194-5357 ; ; 1006
Disciplina	006.3
Soggetti	Computational intelligence Artificial intelligence Computational Intelligence Artificial Intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Computer-aided Hepatocarcinoma Diagnosis using Multimodal Deep Learning -- Multi-Agent System and Classification Algorithms applied for eHealth in order to Support the Referral of Post-Operative Patients -- A computing framework to check real-time requirements in ambient intelligent systems -- A Ubiquitous Computing Platform for Virtualizing Collective Human Eyesight and Hearing Capabilities -- A Recurrent Neural Network approach to improve the Air Quality Index prediction -- Experiences in Context Aware-Services -- Gesture Control System for Industry 4.0 Human-Robot Interaction -- A Usability Test -- Attribute Grammar Applied to Human Activities Recognition in Intelligent Environments.
Sommario/riassunto	This book presents the latest research on Ambient Intelligence including software and applications. Ambient Intelligence (Aml) is a paradigm emerging from Artificial Intelligence, in which computers are used as proactive tools for assisting people with their day-to-day activities, making everyone's lives more comfortable. Another main concern of Aml originates from the human-computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user-friendly interfaces. This field is evolving

rapidly, as can be seen in emerging natural language and gesture-based types of interaction. This symposium was jointly organized by the Universidade do Minho, Technical University of Valencia, Hiroshima University, and University of Salamanca. The latest installment was held in Ávila, Spain, from 26th to 28th June 2019. The authors wish to thank the sponsors: IEEE Systems Man and Cybernetics Society, Spain Section Chapter and the IEEE Spain Section (Technical Co-Sponsor), IBM, Indra, Viewnext, Global Exchange, AEPIA, APPIA and AIR Institute. .
