

1. Record Nr.	UNINA9910484969603321
Titolo	Cannabinoids and Neuropsychiatric Disorders // edited by Eric Murillo-Rodriguez, S. R. Pandi-Perumal, Jaime M. Monti
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-57369-9
Edizione	[1st ed. 2021.]
Descrizione fisica	1 online resource (XVII, 153 p. 43 illus., 4 illus. in color.)
Collana	Advances in Experimental Medicine and Biology, , 2214-8019 ; ; 1264
Disciplina	615.7827
Soggetti	Medicine - Research Biology - Research Neurosciences Biomedical Research Neuroscience
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This volume highlights the recent advances in the understanding of the endocannabinoid system and the likely benefit from the therapeutic effects of cannabinoid treatment in a variety of health issues. Archeological evidence has shown that Cannabis has a long history of use for multiple purposes, including the treatment of medical conditions. The primary active constituent of the hemp plant Cannabis sativa, delta 9-tetrahydrocannabinol (9-THC), causes euphoria, enhancement of sensory perception, tachycardia, antinociception, difficulties in concentration and impairment of memory, among other effects. Despite these undesirable effects, signaling is mostly inhibitory and suggests a putative role for cannabinoids as therapeutic agents by managing several diseases where inhibition of neurotransmitter release would be beneficial. The themes of this book have been edited and written by world-leaders in the field, The contents of the volume aims at readers from a range of academic and professional disciplines, such as biomedicine, several areas of biology, neurology, clinical medicine and pharmacy.
