

1. Record Nr.	UNINA9910484995503321
Titolo	Cutaneous lymphomas : unusual cases 3 // edited by Oleg E. Akilov
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2021] ©2021
ISBN	3-030-59129-8
Descrizione fisica	1 online resource (132 pages) : illustrations
Disciplina	616.99446
Soggetti	Lymphomas Limfomes Llibres electrònics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Intro -- Preface -- Contents -- List of Authors -- I: Mycosis Fungoides and Mimickers -- Case 1. Folliculotropic Mycosis Fungoides with Central Nervous System Involvement -- References -- Case 2. Erythema Gydatum Repens-Like Mycosis Fungoides with Large Cell Transformation -- References -- Case 3. Eczema Molluscum in a Patient with Erythrodermic Mycosis Fungoides -- References -- Case 4. Parakeratosis Variegata-Like Poikilodermatous CD8+ Mycosis Fungoides -- References -- Case 5. Parakeratosis variegata in a patient with CD8+ mycosis fungoides with post-inflammatory hypopigmentation -- References -- Case 6. Poikilodermatous Mycosis Fungoides -- References -- Case 7. Tumor Mycosis Fungoides with Xanthomatized Atypical Lymphocytes -- References -- Case 8. CD20+ Mycosis Fungoides Partially Responsive to Rituximab -- Reference -- Case 9. Chronic Lymphocytic Inflammation with Pontine Perivascular Enhancement Responsive to Steroids (CLIPPERS) in a Patient with Granulomatous Mycosis Fungoides and Multiple Tumors -- References -- Case 10. Folliculotropic Mycosis Fungoides with Exuberant Neutrophil-Rich Scale and Follicular Plugging Mimicking Hypertrophic Actinic Keratosis -- References -- Case 11. Small plaque parapsoriasis-like mycosis fungoides -- References -- Case 12. Extragenital Lichen Sclerosus et Atrophicans Mimicking Hypopigmented

Mycosis Fungoides -- References -- Case 13. T-Cell-Rich Angiomatoid Polypoid Pseudolymphoma (TRAPP) of the Skin -- References -- II: Sezary Syndrome -- Case 14. Pustular Sezary syndrome -- Reference -- Case 15. De novo expression of CD26 on Sezary cells as an indicator of the disease progression in a patient with Sezary syndrome -- Reference -- Case 16. Sezary syndrome presenting with papuloerythroderma of Ofuji and leonine facies -- References -- III: CD30+ Lympho proliferative Disorders and Mimickers. Case 17. Mycosis fungoides-like presentation of primary cutaneous anaplastic large cell lymphoma -- References -- Case 18. Anaplastic lymphoma kinase-positive primary cutaneous anaplastic large cell lymphoma -- References -- Case 19. Successful treatment of primary cutaneous anaplastic large cell lymphoma on the penile shaft with brentuximab vedotin and allogenic stem cell transplant -- References -- Case 20. Lymphomatoid papulosis type D in a child with CD8+ hypopigmented mycosis fungoides -- References -- Case 21. Lymphomatoid papulosis and autoimmunity -- References -- Case 22. Infusion-related CD30-positive lymphomatoid drug eruption secondary to melphalan -- References -- Case 23. Arthropod reaction with CD30 positive infiltrate and ulceration mimicking CD30 lymphoproliferative disorder -- References -- IV: Extranodal NK/T-Cell Lymphoma -- Case 24. Extranodal NK/T-Cell lymphoma, nasal type -- References -- Case 25. EBV-associated extranodal NK/T-Cell lymphoma with / TCR expression presented as aphthous stomatitis -- References -- Case 26. Extranodal NK/T-Cell lymphoma, extra-nasal type -- References -- Case 27. Disseminated extranodal NK/T-cell lymphoma -- References -- V: /-Positive T-Cell Lymphomas -- Case 28. Primary cutaneous T-cell lymphoma with mycosis fungoides-like plaques -- References -- Case 29. Indolent primary cutaneous T-cell lymphoma mimicking mycosis fungoides -- References -- Case 30. Primary cutaneous T-cell lymphoma with gamma/delta () phenotype: MF or indolent type of gd? -- References -- Case 31. Primary cutaneous unilateral non-cytotoxic T-cell lymphoma slowly progressing into tumors -- References -- Case 32. Primary cutaneous T-cell lymphoma with panniculitis-like presentation -- References -- VI: CD8+ Cytotoxic Lymphoma and Mimickers. Case 33. Primary cutaneous aggressive epidermotropic CD8-positive T-cell lymphoma with initial protracted course -- References -- Case 34. Primary cutaneous aggressive epidermotropic T-cell lymphoma (PC-AETCL) with an aberrant immune phenotype -- References -- Case 35. CD8+ T-cell lymphoma with cytotoxic phenotype -- Case 36. Primary cutaneous aggressive epidermotropic T-cell lymphoma as a composite lymphoma with B-cell chronic lymphocytic leukemia -- References -- Case 37. Primary cutaneous aggressive epidermotropic CD8+ cytotoxic T-cell lymphoma with bullous manifestation -- Reference -- Case 38. Leukemoid reaction mimicking aggressive epidermotropic CD8+ T-cell lymphoma -- References -- VII: Peripheral T-Cell Lymphoma with Secondary Skin Involvement -- Case 39. Cutaneous relapse of peripheral T-cell lymphoma, NOS by extension -- Reference -- Case 40. Generalized lymphadenopathy and poikiloderma due to prolonged interferon--1b Therapy misdiagnosed as peripheral T-cell lymphoma -- References -- VIII: Posttransplant Lympho proliferative Disorders -- Case 41. Cutaneous Epstein-Barr Virus post-transplant lymphoproliferative disorder -- References -- Case 42. Primary cutaneous CD30 T-cell posttransplant lymphoproliferative disorder with expression -- References -- IX: Cutaneous B-Cell Lymphomas -- Case 44. Primary cutaneous diffuse large B-cell lymphoma, leg type

presenting on the scalp -- References -- Case 45. Primary Cutaneous Diffuse Large B Cell Lymphoma, Leg Type (PCDLBCL-LT) Treated with Bcl-2 Inhibitor, Venetoclax -- References -- Case 43. Primary cutaneous marginal zone lymphoma presented as facial patches unresponsive to rituximab -- References -- X: Blastic Plasmacytoid Dendritic Cell Neoplasm -- Case 46. Bruise-like nodules of blastic plasmacytoid dendritic cell neoplasm on the background of diffuse petechiae -- References.

Case 47. Blastic plasmacytoid dendritic cell neoplasm presenting with deep purple nodules -- References -- Case 48. A solitary nodule of blastic plasmacytoid dendritic cell neoplasm in a young patient -- References -- XI: Leukemias with the Secondary Skin Involvement -- Case 49. Adult T-cell leukemia/lymphoma -- References -- Case 50. A relapse of T-cell large granular lymphocytic (LGL) leukemia with chronic NK lymphocytosis in the skin -- References -- XII: Other Lympho proliferative Disorders -- Case 51. Indeterminate dendritic cell histiocytosis -- References -- Case 52. A unique presentation of hemophagocytic lymphohistiocytosis with ulcerating papulonodules -- References.
